The Global Programme on the Enhancement of Maritime Security is committed to providing technical assistance to combat the rising threats of terrorism, piracy, armed robbery, organized crime and other illegal activities at sea.

01 Introduction

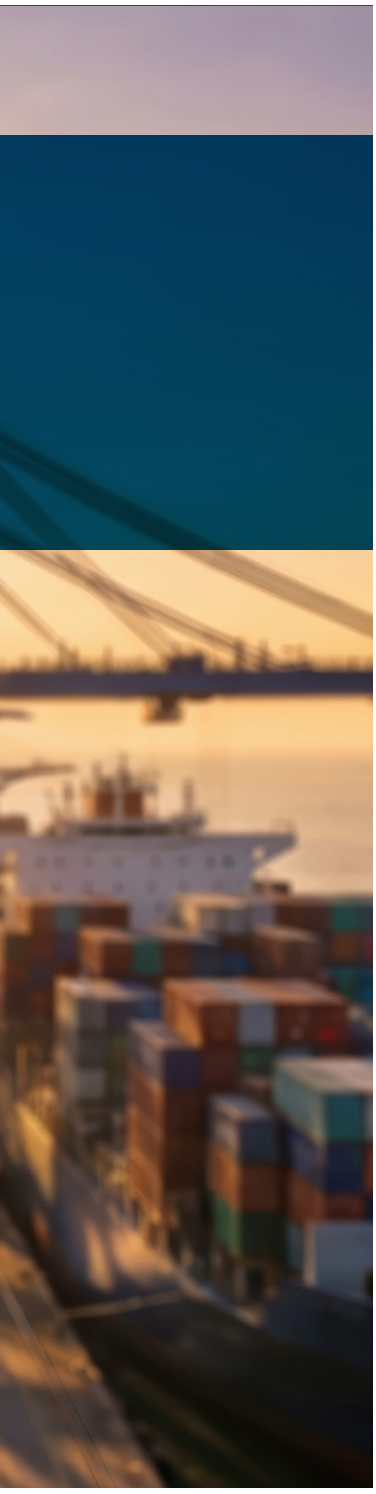
In 2024 the Global Programme on the Enhancement of Maritime Security coordinated by the Maritime Security Section, Maritime Safety Division, continued to focus on targeted assistance directly in response to requests by Contracting Governments to the International Convention for the Safety of Life at Sea (SOLAS) 1974, as amended, related to the implementation of the requirements set out in SOLAS chapter XI-2, the International Ship and Port Facility Security Code (ISPS Code), and other IMO maritime security measures, such as the implementation of the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation (SUA) Convention, security aspects of the Facilitation Convention.

The goal of IMO's Global Programme on the Enhancement of Maritime Security is to help developing countries improve their ability to comply with international rules and standards relating to maritime security giving priority to technical assistance programmes that focus on human resources development and institutional capacity-building.

02 Programme overview

Et parisciis aut faccusa

The programme has significantly expanded the range of training offered to Member States



The Global Programme on the Enhancement of Maritime Security is committed to providing technical assistance to combat the rising threats of terrorism, piracy, armed robbery, organized crime and other illegal activities at sea. It proactively responds to the needs of Contracting Governments under the International Convention for the Safety of Life at Sea (**SOLAS**) 1974, as amended, focusing on its chapter XI-2, the International Ship and Port Facility Security Code (ISPS Code), and other key measures from IMO. This includes the adherence to the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, 1988 (SUA Convention) and its protocols, and addressing security aspects of the Convention on the Facilitation of International Maritime Traffic (FAL Convention).

The activities under the programme were organized and/or co-organized with development partners and targeted Designated Authorities, port and ship security officials, managers, in collaboration with UN representatives, and other implementing partners who share an interest in enhancing maritime security worldwide. This included facilitating meetings with private and public sector stakeholders. The activities comprised two regional training courses for port facility security auditors, held in Morocco and Türkiye, as well as six national activities which focused on various topics including: national port facility security auditors; practical maritime personnel and baggage screening and searching; maritime security needs assessment; and guidance for the development of national maritime security legislation (MSC.1/Circ.1525) in Tunisia, Antigua and Barbuda, the Philippines, Viet Nam and Iraq. Additionally, an online presentation on the maritime security capacity-development available was given to the Designated Authority from Ecuador under this programme.

The programme has significantly expanded the range of training offered to Member States, focusing on both national maritime security governance frameworks and security measures at the port and ship levels.

In 2024, the programme introduced new training on insider threats and practical maritime personnel and baggage screening and searching. In 2024, the programme supported the participation of IMO staff and an expert from the International Criminal Police Organization (INTERPOL) in the regional conference, "Safety First: Women Joining Hands to Shape the Future of Maritime in Africa", held in Sao Tome and Principe.

Finally, in 2024, the programme supported IMO representation in the UN Counter-Terrorism Committee Executive Directorate (CTED) port visits to Montenegro, the United Republic of Tanzania, Côte d'Ivoire, Ghana and Mauritania, in order to assess their compliance with relevant international security instruments, namely SOLAS chapter XI-2, the ISPS Code and the SUA Convention.

03

2024 Financial Overview

The global programme on the Enhancement of Maritime Security is funded through various sources, including Technical Cooperation Funds, individual financial agreements with donor countries for maritime security, and contributions to the International Maritime Security Trust (IMST) Fund. The IMST Fund was established to provide dedicated financial support for technical cooperation activities aimed at strengthening maritime security in developing Member States. This includes assistance with legal, administrative, and operational matters, such as implementing SOLAS chapter XI-2, the ISPS Code, and related instruments.

The 2024 Financial Overview will outline the individuals trained and activities conducted as part of the global programme on the Enhancement of Maritime Security.

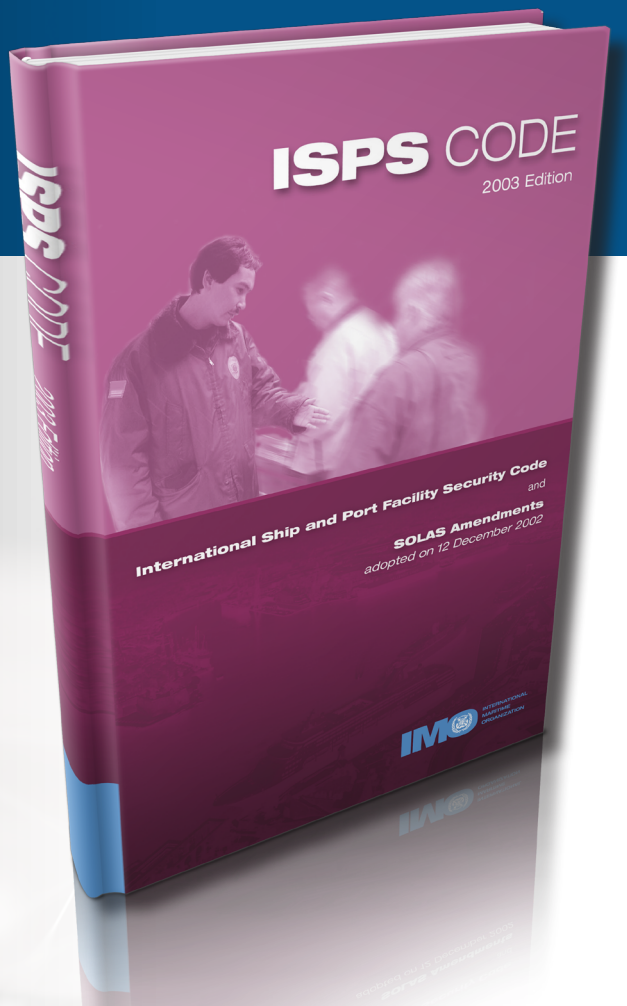
Instruments and Publications

The International Ship and Port Facility (ISPS) Code

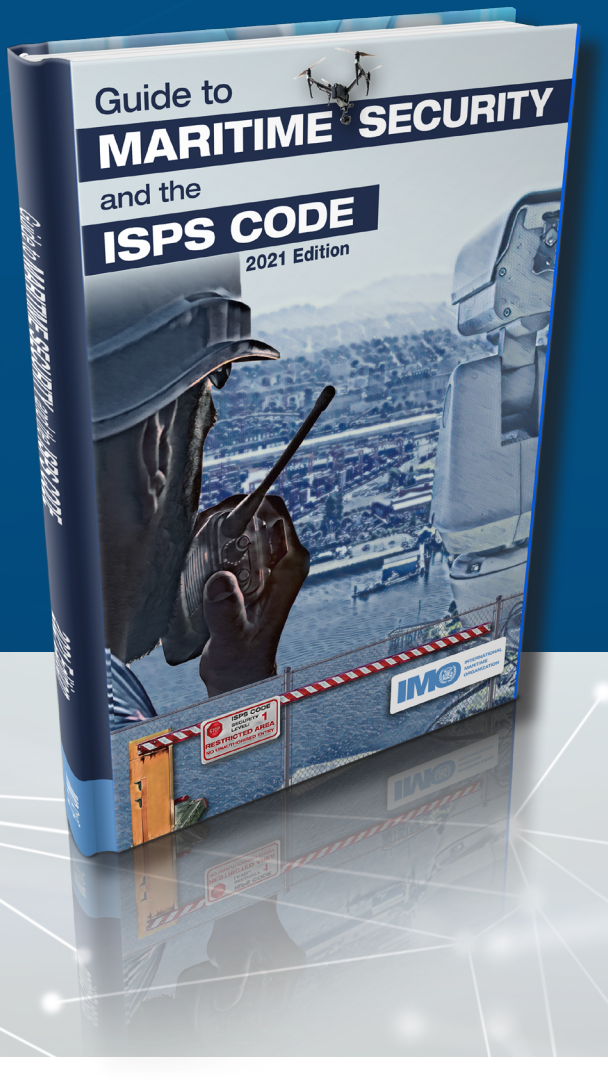
Implemented under SOLAS chapter XI-2 on July 1, 2004, the International Ship and Port Facility Security Code (ISPS Code) established a comprehensive mandatory security framework for global shipping and port facilities. This code consists of two main sections: Part A and Part B. Part A delineates specific security requirements for maritime ships and port facilities that must be adhered to by SOLAS contracting governments, port authorities, and shipping companies to ensure compliance. Part B offers supplementary guidelines to assist in meeting the obligations and standards outlined in Part A.



IMO Guide to Maritime Security and the ISPS Code

This guide has been created to streamline the existing IMO maritime security-related content into a user-friendly companion guide to SOLAS Chapter XI-2 and the ISPS Code. Its purpose is to support nations in enhancing maritime security by refining the necessary legal framework, administrative practices, procedures, and technical and human resources.

The guide aims to aid SOLAS Contracting Governments in executing, validating, complying with, and enforcing the regulations outlined in SOLAS Chapter XI-2 and the ISPS Code. Furthermore, it is designed to be a valuable resource for individuals involved in conducting capacity-building initiatives within the realm of maritime security.



In its 2021 edition, this guide incorporates endorsed guidance by the Maritime Safety Committee on crafting maritime security legislation, as well as managing maritime cyber risks. It also furnishes updated references for additional information to facilitate the implementation of the ISPS Code.

For further guidance, please refer to the additional resources provided:
SOLAS XI-2 and the ISPS Code (imo.org)

Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation (SUA Convention)

In March 1988, a conference convened in Rome to ratify the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation. The primary objective of this convention is to enforce measures against individuals engaged in unlawful activities targeting ships, which encompass ship seizures through force, violent acts against individuals aboard ships, and the placement of destructive devices on ships.

Significant revisions to the 1988 Convention and its associated Protocol were endorsed during the Diplomatic Conference on the **Revision of the SUA Treaties held from October 10 to 14, 2005**. These revisions were formalized as Protocols to the SUA treaties, known as the 2005 Protocols.

05
Model Courses

The programme of model training courses developed by the International Maritime Organization (IMO) is a direct response to the adoption of the 1978 International Convention on Standards of Training, Certification and Watchkeeping for Seafarers (STCW Convention), along with its subsequent amendments. This initiative

emerged from the collective suggestions of various IMO Member States. With contributions from multiple governments, the IMO has meticulously designed these courses to assist in the implementation of the STCW Convention and other related IMO instruments. The primary aim is to equip seafarers with the knowledge and skills required to meet the demands of modern maritime technology, which is becoming increasingly sophisticated.

These model courses serve as versatile tools for Member States and other stakeholders in the maritime sector. They are designed to support the development of detailed training programmes tailored to the specific needs of maritime institutions and their teaching staff. The flexibility of these courses allows them to be used in multiple contexts: whether organizing new courses, enhancing existing ones, or updating and supplementing current training materials. This adaptability ensures that maritime education remains current and relevant, keeping pace with technological advancements and evolving industry standards.

Each model course is comprehensive and structured to facilitate effective learning and instruction. They include an introductory section that sets the stage for the course, a course framework that outlines the objectives and structure, and a general outline that provides an overview of the content. Additionally, a detailed outline breaks down the curriculum into manageable sections, while the instructor manual offers guidance on delivering the material effectively. Finally, a section on evaluation and assessment ensures that both the teaching and learning processes are continually improved, maintaining high standards of maritime education and training.

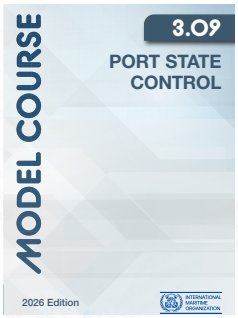
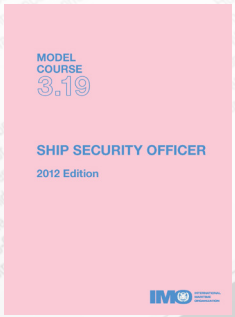
Model courses related to Maritime Security

Model courses related to the 1978 STCW Convention, as amended, are being revised and updated after the adoption of the 2010 Manila Amendments. For maritime security, model courses have been developed for both seafarers and those with responsibilities related to maritime security in ports and port facilities in order to provide a detailed guide to developing tailored training packages on various subjects:

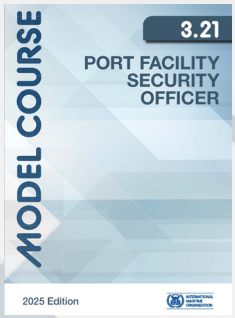


(Model course 3.09) (2001 Edition)
Port State Control

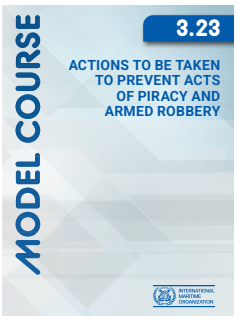


(Model course 3.19) (2012 edition)
Ship Security Officer

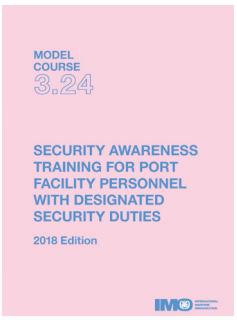
(Model course 3.20) (2011 edition)
Company Security Officer



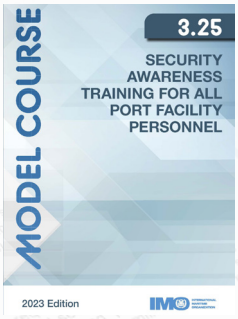
(Model course 3.21) (2015 edition)
Port Facility Security Officer



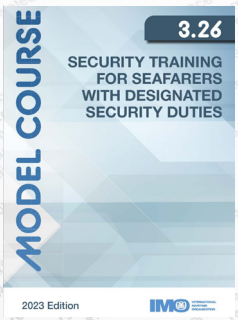
(Model course 3.23) (2011 Edition)
Actions to be Taken to Prevent Acts of Piracy and Armed Robbery



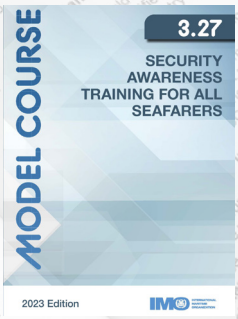
(Model course 3.24) (2018 edition)
Security Awareness Training for Port Facility Security Personnel with Designated Security Duties



(Model course 3.25) (2023 Edition)
Security Awareness Training for all Port Facility Personnel



(Model course 3.26) (2023 Edition)
Security Training for Seafarers with designated Security Duties



(Model course 3.27) (2023 edition)
Security Awareness Training for All Seafarers

** Model courses 3.20, 3.21 and 3.23 are currently under review by the Sub-Committee on Human Element, Training and Watchkeeping (HTW)*

06 Capacity development

IMO's Global Programme on the Enhancement of Maritime Security offers a variety of training courses and technical assistance aimed at helping countries assess and respond to new and emerging threats to shipping and port facilities helping to secure their maritime borders and the free flow of trade. This is possible through a pro-active partnership and project-based approach to development, implementation, and funding of a wide range of the following capacity development initiatives.

Security needs assessment

The aim of IMO's security needs assessments are to assist Member States in identifying specific needs related to the implementation of relevant requirements set out in SOLAS chapter XI-2 and the ISPS Code (policy/governance/operational/physical security level) and the prevailing gaps related to national organization, legislation, physical security and operational aspects aiming at enhancing maritime security on a long-term and sustained basis.

The assessment can include visits to port facilities with reviews of their port facility security plans, the port security regime, inspecting the physical security in place, interviews with the Head of the Designated Authority, the Administration, PFSO, and other staff responsible for maritime security.

Assigned expert advice

Provision of IMO experts to work in close collaboration with the Designated Authority and other departments and agencies to assist Member States, for example, with:

1. Development of national maritime security strategies and legislation
2. Development of recipient country's capabilities to implement and enforce maritime security legislation and related policy and procedures;
3. Establishment of national maritime security/port security committees with Terms of Reference.
4. Security-related training or instruction and familiarization training on security in order to develop and strengthen skills, processes, and resources to enhance maritime security on a long-term and sustained basis;
5. Assistance with ship security assessments and plans;
6. Assistance with port facility security assessments and plans; and
7. Other requirements for tailored technical expertise on ship and port facility security.

Maritime tabletop exercises

Tabletop exercises aim to facilitate discussion and showcase the importance of collaboration among government departments and agencies to enhance inter-agency capabilities and improve maritime security, safety, and environmental responses.

The exercises consist of a range of scenarios, from relatively straightforward issues that a single department or agency can handle to more complex situations requiring the involvement of multiple departments and agencies.

These scenarios are designed to contribute to a national maritime security committee's decision-making abilities, from basic challenges to complex multi-agency involvement. They may include, amongst others, threats to ships, border security issues, incidents involving weapons of mass destruction, and drug smuggling.

Each exercise aims to highlight current contingency planning and inter-agency cooperation, identify best practices, as well as potential gaps and mitigation strategies. The outcomes of the exercises will inform the development of improved contingency planning.

Training courses

The Global Programme on the Enhancement of Maritime Security has various training courses available to interested Member States that can be tailored to meet individual requirements. All courses can be delivered utilizing a Train-the-Trainer approach.

07 Training Courses

Maritime Security Measures governance and oversight for Designated Authorities and Administrations

This training course aims to familiarize government officials with the contents of IMO's Guide to Maritime Security and the ISPS Code, and to assist officials exercising ship and port facility security responsibilities related to the ISPS Code in identifying and applying relevant material in the Guide.

The areas covered include verifying compliance of ships with the Code; identifying a Designated Authority to undertake duties related to port facilities; determining which security duties may be delegated to authorized Recognized Security Organizations (RSOs); establishing the requirements for a Declaration of Security; issuing International Ship Security Certificates (ISSCs), Interim ISSCs and Statements of Compliance for Port Facilities; exercising control and compliance measures; and communicating information to the IMO.

ISPS Code for Designated Authority and or PFSOs

Designed with IMO Model Course 3.21 (2015) on Port Facility Security Officer (PFSO) as a basis, the Train- the-Trainer ISPS Code workshop for Designated Authority (DA) and PFSOs, seeks to enhance participants' ability to effectively perform their duties in accordance with the relevant provisions of IMO's maritime security measures, including SOLAS chapter XI-2, the ISPS Code, the IMO/ILO Code of Practice on Security in Ports, and related guidance.

Through this workshop participants are expected to improve their knowledge and skills vis-à-vis the requirements for PFSO and DA officials to perform duties in accordance with relevant provisions of SOLAS, as defined in section A/17.2 of the Code.

For participants from the DA, the workshop will also provide a solid grounding on the related oversight roles and responsibilities.

All participants benefit from IMO's Train the Trainer approach, enabling them to conduct similar courses on the subject as trainers.

ISPS Code Training for Port Facility Security Personnel with designated security duties

To improve the knowledge and skills of participants vis-à-vis the requirements for Personnel with Designated Security Duties and representatives of the DA to undertake their respective responsibilities in accordance with the relevant provisions of SOLAS chapter XI-2, the ISPS Code and related guidance; while also benefiting from IMO's Train the Trainer approach, which enables them to conduct similar courses on the subject as trainers.

IMO Model Course 3.24 on Security Training for Port Facility Personnel with Designated Security Duties is used as a basis for the training modules.

ISPS Code Self- Assessment and Training Workshop (SATW) – port/port facility security

This workshop is designed to strengthen the knowledge of Designated Authority officials, and the technical capability of port security officials and managers, with respect to enhancing maritime security by conducting effective Self-Assessments and Audits, in accordance with the applicable provisions of the ISPS Code and relevant IMO guidance, such as MSC.1/Circ.1192 on Guidance on Voluntary Self-Assessment by SOLAS Contracting Governments and by Port Facilities, utilised to conduct internal audits and to verify that Port Facility Security Plans (PFSPs) and associated measures are implemented effectively.

This workshop is particularly useful for PFSO's who will have assisted in the implementation of the training provisions outlined under ISPS Code B/18.1.17 on the duties and responsibilities of an internal auditor for port facilities.

Advanced Drills and Exercise Workshop (ADEW) (port/port facility)

These workshops, which can be delivered at the national or regional level, are designed to strengthen the technical capability of Designated Authority and port security officials and managers with respect to enhancing maritime security through the process of conducting drills and exercises in accordance with the ISPS Code and the relevant MSC Circulars by using the APEC Drills and Exercises Manual.

Further, participants are expected to be able to review the pre-planned APEC Manual sample exercises in order to modify them to meet their own needs in the planning and conducting of drills and exercises.

Port Facility Security Audit Workshop for Government Officials

The objective of this training is to equip participants, specifically from the Designated Authorities, with the skills and knowledge required to effectively conduct oversight in line with established IMO Maritime Security measures, including the relevant provisions of SOLAS chapter XI-2 and the ISPS Code.

Furthermore, the workshop covers guidance on how to conduct port facility security audits, effective preparation of reporting and follow-up actions that those activities generate and issues pertaining to the oversight roles and responsibilities of the DA. Upon completion of the course, participants should be able to conduct maritime security audits either as an auditor or audit team leader. The workshop includes practical exercises, role playing and a visit to a port facility whenever possible.

Familiarisation on the MSC.1/Circ. 1525 Guidance for the development of national maritime security legislation

This workshop aims to assist governments with the implementation of SOLAS chapter XI-2 and the ISPS Code, including control and compliance measures, with reference to MSC.1/Circ.1525 on the development of national maritime security legislation.

The objective is to improve the knowledge and skills of the legal staff and other officials in transposing the requirements of the international conventions into national laws and regulations, and to familiarise officials with the relevant guidelines and best practices on maritime security measures.

The course provides guidance on several aspects of national legislation that could be utilized to fully implement the Maritime Security Measures. The participants will be able to understand which topics should be included to give effect to the maritime security measures at the national level.

IMO whole of government approach to maritime security

The objective of this training is to provide an innovative cutting-edge programme of integrated workshops and tailored support to develop a National Maritime Security Committee, Risk Register and Security Strategy to help improve national level maritime security governance.

A cross-government committee draws together all key stakeholders and the Risk Register provides a powerful tool to aid the committee to objectively identify security gaps and prioritize where to steer future policy development and capacity development effort.

The National Maritime Security Strategy explains how the Member State will address the risks identified in the Risk Register, and its long-term vision for the security of the maritime domain, with its development overseen by the Committee.

Introduction to Passenger and Baggage Screening and Searching workshop

The objective of the Introduction to Passenger and Baggage Screening and Searching workshop is to raise awareness of the importance of effective security screening and searching of passengers and their baggage and is aimed at port security staff, supervisors and Port Facility Security Officers involved in maritime passenger service operations. The workshop will also benefit ship security staff.

The course content includes: ISPS Requirements; risk assessment; restricted articles; design of the search point; searching of passengers; screening; searching of baggage; dealing with oversized baggage and new technologies.

Train the Trainers workshop on the implementation of ISPS Code for PFSO/DA

The objective of the workshop is to consolidate the knowledge of all participants regarding SOLAS chapter XI-2, the ISPS Code and maritime security in general and provide them with theoretical knowledge required to conduct the training of PFSOs in accordance with the Training Requirements outlined in the ISPS Code and IMO Model Course 3.21. This will be achieved through engaging the participants in group exercises to further their knowledge of the Code and familiarize themselves with the best way to plan and conduct such exercises and by simulating training activities to verify the level of competency achieved.

The course covers awareness training to safeguard against current and emerging threats and vulnerabilities, including preventive and mitigation strategies to manage different risks. In addition, the workshop includes training to address the security provision and requirement of dangerous good transport by sea.

TRAINING

Workshop on Port Facility Security Assessment

This workshop focuses on Port Facility Security Assessments (PFSAs) – assisting representatives of the Designated Authority on how to divide the port into independent port facilities and conduct a port security assessment through identification of gaps. The gaps may include:

- physical security; structural integrity; personnel protection systems;
- procedural policies;
- telecommunications systems;
- relevant infrastructure;
- and utilities and other areas posing a risk to persons, property or operations within the port facility.

Intermediate Maritime Domain Awareness workshop

Building on the introductory workshop, this three-day intermediate workshop provides good practice on: information collection, correlation, format, and standards; building a National Maritime Information Sharing. Capability; creating Standard Operating Procedures; and conducting an external Maritime Domain Awareness capability assessment.

Intermediate Maritime Domain Awareness workshop

Building on the introductory workshop, this three-day intermediate workshop provides good practice on: information collection, correlation, format, and standards; building a National Maritime Information Sharing. Capability; creating Standard Operating Procedures; and conducting an external Maritime Domain Awareness capability assessment.

Practical Maritime Person and Baggage Screening and Searching

This a five days course includes a significant practical element and provides hands-on training in the effective use of Walk-Through Metal Detectors and conventional x-ray screening machines to detect weapons or any other dangerous substances and devices intended for use against persons, ships or ports, and includes the provision of security equipment to the Member State including, inter alia, test pieces, imitation firearms, and inert explosives for training purposes.

The aim is to provide a "Train-the-Trainer" experience with the Member State being able to use the expertise gained and the security equipment provided to train their security staff in effective screening and search techniques following completion of the course.

08 Activities in 2024 Overview

In 2024, 23 national and regional activities were delivered under the Global Programme on the Enhancement of Maritime Security organized and/or co-organized with Member States, regional and international partner organisations

The Global Programme on the Enhancement of Maritime Security delivered in-person targeted assistance, in response to requests by SOLAS Contracting Governments, related to the implementation of the requirements set out in SOLAS chapter XI-2 and the ISPS Code and other IMO maritime security measures.

On the ISPS Code, the assistance was delivered through the organization of regional and national workshops, for Designated Authority, Port Facility Security Officers, port and ship security officials, and other related personnel, specially designed to review and enhance the implementation of effective maritime security measures.

In 2024, 23 national and regional activities were delivered under the Global Maritime Security Programme organized and/or co-organized with Member States, regional and international partner organizations. The activities covered training on: Port Facility Security Auditors; Practical Maritime Person and Baggage Screening and Searching; Maritime Security Capacity development ; Maritime Security Needs Assessment; IMO Guidance for the development of national maritime security legislation (MSC.1/Circ.1525); IMO representation in UN CTED security visits; and other IMO representations in international conferences to enhance maritime security.

The programme also promoted regional and subregional cooperation and coordination to strengthen maritime security and continued to work with other United Nations agencies and regional organizations to build partnerships and put in place arrangements designed to combat terrorism and other forms of maritime crime and enhance maritime security.

09 Implementing Partnerships

As a signatory to and member entity of the UN Global Counter-Terrorism Coordination Compact, IMO contributes with other entities to the fight against terrorism and the enhancement of border security worldwide by engaging in capacity development activities that relate to the implementation of, compliance with and enforcement of the provisions of SOLAS chapter XI-2, the ISPS Code, the 1988 and 2005 SUA treaties and protocols, and the security related aspects of the FAL Convention.

10 Women in Maritime Security

From 2 to 4 September 2024, the Global Programme on the Enhancement of Maritime Security participated in the WOMESA / NPWMP-WCA / WIMOWCA Joint Conference "Safety first: Women joining hands to shape the future of Maritime in Africa"

IMO served as a moderator at the Conference. The purpose of this Conference was to promote the participation of women in maritime security from various international organizations, thereby enhancing the IMO's regulatory framework on maritime security.

The Maritime Security Section maintains ongoing collaboration with the IMO Women in Maritime Programme to coordinate related activities and enhance the implementation of UN Sustainable Development Goal (SDG) number 5 Gender Equality.

11 Activity highlights

List of Activities funded by the Global Programme on the Enhancement of Maritime Security

Activity Title	Month Del	Location	Outputs
Presentation at the Maritime Security Centre of Excellence (MARSEC COE)	February	Istanbul, Türkiye	Enhanced knowledge of IMO's regulatory framework on maritime security, addressing emerging trends and patterns in maritime criminal and terrorist activities, focusing on preventative security through effective ISPS Code implementation, as well as the capacity development initiatives including the Enhanced IMO Maritime Security Programme and the Red Sea project.
IMO representation in the 73rd meeting of the EU Stakeholders Advisory Group on Maritime Security (SAGMAS)	June	Brussels, Belgium	Enhanced knowledge regarding the latest developments in capacity development under its Global Programme on the Enhancement of Maritime Security.
IMO representation in the 12th Regional MARSEC Practitioner Programme (RMPP)	July	Singapore	Increased awareness on Global trends in maritime security and the latest developments in capacity development under the Global Enhancement of Maritime Security Programme, in order to promote the work of IMO with all stakeholders in the Asia-Pacific region.
Presentation at the Maritime Security Centre of Excellence (MARSEC COE)	June	Istanbul, Türkiye	Enhanced knowledge of IMO regulatory framework on maritime security with a focus on IMO's maritime security assessment framework provided in MSC.1/Circ.1283 and Chapter 5 of the IMO Guide to Maritime Security and the ISPS Code 2021 Edition, at the Maritime Security Centre of Excellence (MARSEC COE) during the NATO Comprehensive Maritime Security Operations course.
National training course for port facility security auditors	March	Tunis, Tunisia	Enhanced the port facility security audit skills of participants in order to consolidate the ability of the Designated Authorities to fulfil their audit obligations under SOLAS chapter XI-2 and the ISPS Code, ensuring the effective application of the ISPS Code at Tunisian port facilities.
IMO practical maritime person and baggage screening and searching workshop	March	Saint John's, Antigua and Barbuda	Enhanced the skills and knowledge of the participants to enable them to calibrate, maintain and effectively operate walk-through metal detectors (WTMD), x-ray and explosive trace detection (ETD) equipment in accordance with the provisions of SOLAS chapter XI/2 and the ISPS Code.
National training course for Port Facility Security Auditors	May	Manila, Philippines	Enhanced the port facility security audit skills of participants in order to consolidate the ability of the Designated Authorities to fulfil their audit obligations under SOLAS chapter XI-2 and the ISPS Code, ensuring the effective application of the ISPS Code at the Philippines port facilities.
Maritime Security Capacity development Online Workshop for Ecuador	September	Ecuador	Enhanced the knowledge of the Designated Authority of Ecuador of the capacity development assistance offered under the Global Enhancement of Maritime Security Programme; addressed queries related to programme activities; and assisted in the identification of any immediate capacity development needs.

Activity Title	Month Del	Location	Outputs
Maritime Security Needs Assessment	October	Hanoi, Viet Nam	Identified specific needs related to the implementation of relevant requirements set out in SOLAS chapter XI□2 and the ISPS Code, including gaps related to national organization, legislation and physical security and operational aspects aiming at enhancing maritime security on a long□term and sustained basis.
National workshop on IMO Guidance for the development of national maritime security legislation (MSC.1/Circ.1525)	December	Basra, Iraq	Supported the maritime administration of Iraq in the process of transposition and implementation in national law of SOLAS chapter XI-2 and the ISPS Code, in particular through the use of IMO circular MSC.1/ Circ.1525.
Maritime Strategy engagements with the Nigerian Maritime Administration and Safety Agency (NIMASA) (IMO/UK/IMSOT)	Abuja, Nigeria	Abuja, Nigeria	Supported the implementation of the IMO model of the whole of government approach to maritime security to the Nigerian Maritime Administration and Safety Agency
IMO support to technical assistance plan to Benin	March	Virtual	IMO delivered a project proposal for funding as part of the UN Global Counter-Terrorism Coordination Compact (UN COMPACT), coordinated and prioritized the Counter Terrorism/Preventing and Countering Violent Extremism technical assistance plan for Benin.
IMO representation in UN CTED missions	December	Multiple	Delivered assessments, alongside UN CTED and other UN partners, of the compliance with various international security instruments, namely, SOLAS chapter XI/2, the ISPS Code and the SUA Convention, in missions to Montenegro, United Republic of Tanzania, Cote d'Ivoire, Ghana and Mauritania.
IMO representation at Workshop to raise awareness and launch the roadmap on countering terrorist threats against vulnerable targets in Mauritania	November	Nouakchott, Mauritania	Enhanced awareness on the importance of effective Maritime Security Measures to the protection of critical national infrastructure in Mauritania and to assist with the launch of the roadmap on countering terrorist threats against vulnerable targets.
IMO representation in the maritime security conference of the Combined Maritime Forces (CMF)	April	Manama, Bahrain	Enhanced awareness of the maritime security challenges in the Red Sea, Gulf of Aden, Indian Ocean and Arabian Sea, as well as to promote the work of the DCoC and its sustainability.
15th Industry Strategic eeting/ Maritime Security Dialogue of EUNAVFOR ATALANTA	May	Madrid (Spain)	Raised awareness of the maritime security challenges in the Red Sea, Gulf of Aden, Indian Ocean and Arabian Sea, as well as to promote the work of the DCoC and its sustainability.

Activity Title	Month Del	Location	Outputs
Material and publications in support of maritime security capacity-building	December	Multiple	Promotion and visibility of IMO maritime security capacity-building work. Dissemination of IMO maritime security measures and promotion of IMO Guide to Maritime Security and the ISPS Code aiming to enhance the capacity of SOLAS Contracting Governments to implement SOLAS chapter XI-2 and the ISPS Code. Improvement in the planning and delivery of technical cooperation and capacity-building activities in connection with the enhancement of maritime security.
IMO participation in WOMESA/NPWMP-WCA/ WIMOWCA Joint Conference "Safety first: Women joining hands to shape the future of Maritime in Africa"	August	São Tomé, São Tomé and Príncipe	Assisted with the moderation of the WOMESA/ NPWMP-WCA/WIMOWCA Joint Conference titled "Safety First: Women Joining Hands to Shape the Future of Maritime in Africa." The purpose of this conference was to promote the participation of women in maritime security from various international organizations, thereby enhancing the IMO's regulatory framework on maritime security.
Regional training course for port facility security auditors	September	Istanbul, Türkiye	Enhanced the port facility security audit skills of participants in order to consolidate the ability of the Designated Authorities to fulfil their audit obligations under SOLAS chapter XI-2 and the ISPS Code, ensuring the effective application of the ISPS Code at the participants' port facilities.
Drafting of fundraising proposals for implementation of IMO Maritime Security instruments and recommendations	December	Virtual	Drafted proposals for the implementation of IMO maritime security instruments including the completed description of the action (DoA), logical framework matrix (Logframe), activities budget, IMO project organogram and any other related documentation required by the EU and in accordance with EU guidelines for Specific Objective 3 (SO 3 – "The capacities and capabilities of national and regional maritime security centres are strengthened") and Specific Objective 4 (SO 4 – "Intra-national/inter-agency and inter-regional coordination and cooperation are developed") of Component 2 (Gulf of Guinea) of the EU Enhancing Maritime.
Regional training course for port facility security auditors	January	Casablanca, Morocco	Enhanced the port facility security audit skills of participants in order to consolidate the ability of the Designated Authorities to fulfil their audit obligations under SOLAS chapter XI-2 and the ISPS Code, ensuring the effective application of the ISPS Code at the participants' port facilities.
