flag, to implementing mandatory measures to ensure the effective implementation of this Strategy; .3 the need to consider the impacts of measures on States, including developing countries, in particular on LDCs and SIDS, and their specific emerging needs, as recognized in the Revised Strategic Plan for the Organization (resolution A.1149(32)); and .4 the need for evidence -based decision -making balanced with the precautionary approach as set out in resolution MEPC.67(37). 4 CANDIDATE SHORT -, MID - AND LONG -TERM GHG REDUCTION MEASURES WITH POSSIBLE TIMELINES AND THEIR IMPACTS ON STATES Timelines 4.1 Candidate measures set out in this 2023 IMO GHG Strategy should be consistent with the following timelines: .1 short-term GHG reduction measures are the measures finalized and agreed by the Committee between 2018 and 2023, as included in appendix 1; .2 the basket of mid -term GHG reduction measures should be finalized and agreed by the Committee by 2025. Dates of entry into force and when the measure(s) can effectively start to reduce GHG emissions could be defined for the basket or for each measure individually; - agreed by the Committee by 2025. Dates of entry into force and when the measure(s) can effectively start to reduce GHG emissions could be defined for the basket or for each measure individually; .3 other candidate mid -term GHG reduction measures could be finalized and agreed by the Committee between 2023 and 2030. Dates of entry into force and when the measure can effectively start to reduce GHG emissions would be defined for each measure individually; and .4 possible long-term measures could be measures finalized and agreed by the Committee beyond 2030, to be developed as part of the 2028 review of the IMO GHG Strategy. 4.2 The list of candidate measures is non-exhaustive and is without prejudice to measures the Organization may further consider and adopt. Short-term GHG reduction measures 4.3 In accordance with regulations 25.3 and 28.11 of MARPOL Annex VI, areview of the mandatory goal -based technical and operational measures to reduce carbon intensity of international shipping (the "short -term GHG reduction measures") shall be completed by 1 January 2026. 4.4 The Committee may decide to initiate areview of the other short-term measure(s) as - international shipping (the "short -term GHG reduction measures") shall be completed by 1 January 2026. 4.4 The Committee may decide to initiate areview of the other short-term measure(s) as included in appendix 1. Basket of candidate mid-term GHG reduction measures 4.5 In accordance with the timelines set out in this Strategy and the Work Plan, abasket of candidate measure(s), delivering on the reduction targets, should be developed and finalized comprised of both: RESOLUTION MEPC.377(80) (adopted on 7 July 2023) 2023 IMO STRATEGY ON REDUCTION OF GHG EMISSIONS FROM SHIPSMEPC 80/17/Add.1 Annex 15, page 8 I:\MEPC\80\MEPC 80-17-Add.1.docx .1 atechnical element, namely agoal -based marine fuel standard regulating the phased reduction of the marine fuel's GHG intensity; and .2 an economic element, on the basis of amaritime GHG emissions pricing mechanism. The candidate economic elements will be assessed observin
