should be inserted in the appropriate columns and the required particulars should be recorded chronologically in the blank spaces. Each completed operation should be signed for and dated by the officer or officers in charge. The master of the ship should sign each completed page. The use of an electronic record book to record activities is an alternative method to ahard copy record book. Electronic recording and reporting should be encouraged as it may have many benefits and may allow ships to utilize their technology to reduce administrative burdens and contrib ute to onboard environmental initiatives, e.g. reduction of paper use. In case electronic recording is to be used, resolution MEPC.312(74) may be used for guidance. Biofouling Record Book Part Icontains many references to observations regarding fouling rating. These observations may be included in separate reports including observations of - Biofouling Record Book Part Icontains many references to observations regarding fouling rating. These observations may be included in separate reports including observations of subsections and corresponding photos/video. The entries in Biofouling Record Book Part Imay be asummary only including aconclusion on whether the activity is in line with the BFMP. Biofouling Record Book Part Ishould be kept on board the ship in aplace where it is readily available for inspection at all reasonable times and for the life of the ship. Any inspection of Biofouling Record Book Part Ishould be performed as expeditiously as possible without causing the ship to be unduly delayed. RESOLUTION MEPC.378(80) (adopted on 7 July 2023) 2023 GUIDELINES FOR THE CONTROL AND MANAGEMENT OF SHIPS' BIOFOULING TO MINIMIZE THE TRANSFER OF INVASIVE AQUATIC SPECIESMEPC 80/17/Add.1 Annex 17, page 55 I:\MEPC\80\MEPC 80-17-Add.1.docx LIST OF ITEMS TO BE RECORDED (A) Proactive cleaning - MINIMIZE THE TRANSFER OF INVASIVE AQUATIC SPECIESMEPC 80/17/Add.1 Annex 17, page 55 I:\MEPC\80\MEPC 80-17-Add.1.docx LIST OF ITEMS TO BE RECORDED (A) Proactive cleaning 1 Date and location of ship when proactive cleaning occurred. 2 General observations with regard to biofouling prior to cleaning, if any (i.e. extent of microfouling and macrofouling in line with the defined ratings). 3 Records of permits required to undertake in-water proactive cleaning, if applicable. 4 Details of hull and niche areas cleaned. 5 General observations with regard to biofouling after the cleaning, if any (i.e. extent of microfouling and macrofouling in line with the defined ratings). 6 Reference to any supporting evidence/reports of the cleaning (e.g. report from supplier, photographs/videos and/or receipts), if any. 7 Method, manufacturer and model of proactive cleaning method used, if not given in BFMP. - supplier, photographs/videos and/or receipts), if any. 7 Method, manufacturer and model of proactive cleaning method used, if not given in BFMP. 8 Reference to test standard for which the method has been tested, if not given in BFMP. 9 Name, position and signature of the person in charge of the activity. (B) Inspection 1 Date and location of inspection. 2 Methods used for inspection (including inspection tools/devices). 3 Areas inspected of the ship. 4 Observations with regard to biofouling (extent of microfouling and macrofouling in line with the defined fouling rates). 5 Observations with regard to anti-fouling system (AFS) condition. 6 Reference to any supporting evidence/reports of the inspection. 7 Name, position and signature of the person in charge of the activity. (C) Reactive cleaning 1 Date and location of ship when cleaning occurred. 2 Records of permits required to undertake in-water
