63 Refer to the 2022 Guidelines on operational carbon intensity indicators and the calculation methods (CII guidelines, G1) (resolution MEPC.352(78)), and the 2022 Interim guidelines on correction factors and voyage adjustments for CII calculations (CII guidelines, G5) (resolution MEPC.355(78)). RESOLUTION MEPC.403(83) (adopted on 11 April 2025) AMENDMENTS TO THE 2022 GUIDELINES ON SURVEY AND CERTIFICATION OF THE ENERGY EFFICIENCY DESIGN INDEX (EEDI)MEPC 83/17/Add.1 Annex 11, page 50 I:\MEPC\MEPC 83-17-Add.1.docx 2 Within three months after the end of each calendar year, the ship shall report to its Administration, or any organization duly authorized by it,64 the attained annual operational CII via electronic communication and using astandardized format developed by the Organization.65 3 Notwithstanding 1 and 2 of this regulation, in the event of any transfer of aship addressed in regulations 27.4, 27.5 or 27.6 completed after 1 January 2023, aship shall, after the end of the calendar year in which the transfer takes place, calculate and report the attained annual operational CII for the full 12 -month period from 1 January to 31 December in the - the end of the calendar year in which the transfer takes place, calculate and report the attained annual operational CII for the full 12 -month period from 1 January to 31 December in the calendar year during which the transfer took place, in accordance with regulations 28.1 and 28.2, for verification in accordance with regulation 6.6 of this Annex, taking into account guidelines developed by the Organization. 66 Nothing in this regulation relieves any ship of its reporting obligations under regulation 27 or this regulation of this Annex. Required annual operational carbon intensity indicator (required annual operational CII) 4 For each ship of 5,000 gross tonnage and above which falls into one or more of the categories in regulations 2.2.5 to 2.2.7, 2.2.9, 2.2.12 to 2.2.14, 2.2.20, and 2.2.24 to 2.2.27 of this Annex, the required annual operational CII shall be determined as follows: Required annual operational CII = (1 – Z100) • CIIR where, Zis the annual reduction factor to ensure continuous improvement of the ship'soperational carbon intensity within aspecific rating level; and CIIR is the reference value. - Required annual operational CII = (1 – Z100) • CIIR where, Zis the annual reduction factor to ensure continuous improvement of the ship'soperational carbon intensity within aspecific rating level; and CIIR is the reference value. 5 The annual reduction factor Z 67 and the reference value CII Rshall be the values defined taking into account the guidelines to be developed by the Organization.68 Operational carbon intensity rating 6 The attained annual operational CII shall be documented and verified against the required annual operational CII to determine operational carbon intensity rating A, B, C, Dor E, indicating amajor superior, minor superior, moderate, minor inferior or inferior performance level, either by the Administration or by any organization duly authorized by it, 69 taking into 64 Refer to the Code for Recognized Organizations (RO Code) (resolutions MSC.349(92) and MEPC.237(65)). 65 Refer to
