(crankshaft revolutions per minute): .1 17.0 g/kWh when nis less than 130 rpm; .2 45 n(–0.2) g/kWh when nis 130 or more but less than 2,000 rpm; and .3 9.8 g/kWh when nis 2,000 rpm or more. Tier II 4 Subject to regulation 3 of this Annex, the operation of amarine diesel engine that is installed on aship constructed on or after 1 January 2011 is prohibited, except when the emission of nitrogen oxides (calculated as the total weighted emission of NO2) from the engine is within the following limits, where n = rated engine speed (crankshaft revolutions per minute): .1 14.4 g/kWh when nis less than 130 rpm; .2 44 n(–0.23) g/kWh when nis 130 or more but less than 2,000 rpm; and .3 7.7 g/kWh when nis 2,000 rpm or more. 22 Refer to the 2024 Guidelines as required by regulation 13.2.2 of MARPOL Annex VI in respect of non-identical replacement engines not required to meet the Tier III limit (resolution MEPC.386(81)). 23 Refer to the Guidelines for the application of the NOx Technical Code relative to certification and amendments of Tier Iengines (MEPC.1/ Circ.679). RESOLUTION MEPC.403(83) (adopted on 11 April 2025) - 23 Refer to the Guidelines for the application of the NOx Technical Code relative to certification and amendments of Tier Iengines (MEPC.1/ Circ.679). RESOLUTION MEPC.403(83) (adopted on 11 April 2025) AMENDMENTS TO THE 2022 GUIDELINES ON SURVEY AND CERTIFICATION OF THE ENERGY EFFICIENCY DESIGN INDEX (EEDI)MEPC 83/17/Add.1 Annex 11, page 25 I:\MEPC\MEPC 83-17-Add.1.docx Tier III 5.1 Subject to regulation 3 of this Annex, in an emission control area designated for Tier III NOx control under paragraph 6 of this regulation (NO x Tier III emission control area), the operation of amarine diesel engine that is installed on aship is prohibited: .1 except when the emission of nitrogen oxides (calculated as the total weighted emission of NO 2) from the engine is within the following limits, where n = rated engine speed (crankshaft revolutions per minute): .1 3.4 g/kWh when nis less than 130 rpm; .2 9 n(–0.2) g/kWh when nis 130 or more but less than 2,000 rpm; .3 2.0 g/kWh when nis 2,000 rpm or more; when .2 that ship is constructed on or after: .1 1 January 2016 and is operating in the North American Emission - .2 9 n(–0.2) g/kWh when nis 130 or more but less than 2,000 rpm; .3 2.0 g/kWh when nis 2,000 rpm or more; when .2 that ship is constructed on or after: .1 1 January 2016 and is operating in the North American Emission Control Area or the United States Caribbean Sea Emission Control Area; .2 1 January 2021 and is operating in the Baltic Sea Emission Control Area or the North Sea Emission Control Area; .3 1 March 2026 and is operating in the Norwegian Sea Emission Control Area. For the Norwegian Sea Emission Control Area, "ship constructed on or after 1 March 2026" means aship: .1 for which the building contract is placed on or after 1 March 2026; or .2 in the absence of abuilding contract, the keel of which is laid or which is at asimilar stage of construction on or after 1 September 2026; or .3 the delivery of which is on or after 1 March 2030. when .3 that ship is operating in a NO x Tier III emission control area other than an emission control area described in paragraph 5.1.2 of this regulation, and is constructed on or after the date of adoption of such an emission control area, - when .3 that ship is operating in a NO x Tier III emission control area other than an emission control area described in paragraph 5.1.2 of this regulation, and is constructed on or after the date of adoption of such an emission control area, or alater date as may be specified in the amendment designating the NOx Tier III emission control area, whichever is later: .1 that ship is constructed on or after 1 January 2025 and is operating in the Canadian Arctic Emission Control Area; RESOLUTION MEPC.403(83) (adopted on 11 April 2025) AMENDMENTS TO THE 2022 GUIDELINES ON SURVEY AND CERTIFICATION OF THE ENERGY EFFICIENCY DESIGN INDEX (EEDI)MEPC 83/17/Add.1 Annex 11, page 26 I:\MEPC\MEPC 83-17-Add.1.docx .2 that ship is constructed on or after 1 January 2027 and is operating in the North-East Atlantic Emission Control Area. For the North-East Atlantic Emission Control Area, "ship constructed on or after 1 January 2027" mean
