CHAPTER III
LIFE-SAVING APPLIANCES AND ARRANGEMENTS

Regulation 4 Evaluation, testing and approval of life-saving appliances and arrangements

17 Paragraph 3 is replaced by the following:

3 Before giving approval to novel life-s aving appliances or arrangements, the Administration shall ensure that such:

.1 appliances provide safety standard s at least equivalent to the requirements

---CHUNK---

SOURCE: MSC.216%2882%29.pdf
Administration shall ensure that such:

.1 appliances provide safety standard s at least equivalent to the requirements of this chapter and the Code and have been evaluated and tested based on the guidelines developed by the Organization; or

.2 arrangements have successfully undergone an engi neering analysis, evaluation and approval in accordance with regulation 38.

18 The following new part C is added after the existing regulation 37:

PART C
ALTERNATIVE DESIGN AND ARRANGEMENTS

Regulation 38
Alternative design and arrangements

1 Purpose

The purpose of this regulation is to provide a methodology for alternative design and arrangements for life-saving appliances and arrangements.

2 General

2.1 Life-saving appliances and arrangement s may deviate from the requirements set out in part B, provided that the alternative de sign and arrangements meet the intent of the

2 General

2.1 Life-saving appliances and arrangement s may deviate from the requirements set out in part B, provided that the alternative de sign and arrangements meet the intent of the requirements concerned and provide an equivalent level of safety to this chapter.

2.2 When alternative design or arrangements deviate from the prescriptive requirements of part B, an engineering anal ysis, evaluation and approval of the design and arrangements shall be carried out in accordance with this regulation.

(adopted on 8 December 2006)
AMENDMENTS TO THE INTERNATIONAL CONVENTION FOR THE SAFETY OF LIFE AT SEA, 1974, AS AMENDED-62 -

3 Engineering analysis

The engineering analysis shall be prepared and submitted to the Administration, based on the guidelines developed by the Organizati on and shall include, as a minimum, the following elements:

.1 determination of the ship type and the life-saving appliance and arrangements concerned;

---CHUNK---

SOURCE: MSC.216%2882%29.pdf
following elements:

.1 determination of the ship type and the life-saving appliance and arrangements concerned;

.2 identification of the prescriptive requ irement(s) with which the life-saving appliance and arrangements will not comply;

.3 identification of the reason th e proposed design will not meet the prescriptive requirements supported by compliance with other recognized engineering or industry standards;

.4 determination of the performance criteria for the ship and the life-saving appliance and arrangements concer ned addressed by the relevant prescriptive requirement(s):

.4.1 performance criteria shall provide a level of safety not inferior to the relevant prescriptive requirements contained in part B; and

.4.2 performance criteria shall be quantifiable and measurable;

.5 detailed description of the alternat ive design and arrangements, including a list of the assumptions used in the design and any proposed operational

---CHUNK---

SOURCE: MSC.216%2882%29.pdf
.5 detailed description of the alternat ive design and arrangements, including a list of the assumptions used in the design and any proposed operational restrictions or conditions;

.6 technical justification demonstrat ing that the alternative design and arrangements meet the safety performance criteria; and

.7 risk assessment based on identifica tion of the potential faults and hazards associated with the proposal.

4 Evaluation of the alternative design and arrangements

4.1 The engineering analysis required in paragraph 3 shal l be evaluated and approved by the Administration, taking into account the guidelines developed by the Organization.

4.2 A copy of the documentation, as approve d by the Administration, indicating that the alternative design and arrangements comply with this regulation, shall be carried on board the ship.

5 Exchange of information

The Administration shall communicate to the Organization pertinent information

board the ship.

5 Exchange of information

The Administration shall communicate to the Organization pertinent information concerning alternative design and arrangements approved by them for circulation to all Contracting Governments.

(adopted on 8 December 2006)
AMENDMENTS TO THE INTERNATIONAL CONVENTION FOR THE SAFETY OF LIFE AT SEA, 1974, AS AMENDED-63 -

6 Re-evaluation due to change of conditions

If the assumptions and operation al restrictions that were s tipulated in th e alternative design and arrangements are changed, the engi neering analysis shall be carried out under the changed condition and shall be approved by the Administration.
