Synopsis Record,

ACKNOWLEDGING the need to review and am end the guidelines for the maintenance and the forms of the Continuous Synopsis Record as result of the experience gained,

HAVING ADOPTED amendments to the provisi ons of the regulation XI-1/3 of the Convention to introduce the IMO Unique Company and Registered Owner Identification Number Scheme and to regulation XI-1/5 of the Convention (SOLAS regula tion XI-1/5) to include in the Continuous Synopsis Record the registered owner and the company identification numbers,

RECOGNIZING the need to reflect th e aforesaid amendments to SOLAS regulation XI-1/5 in the forms of the Continuous Synopsis Record,

1. ADOPTS:

.1 amendments to the Format and Guidelines for the maintenance of the Continuous

Synopsis Record (CSR), as set out in Anne x 1 to the present re solution to reflect
the experience gained;

.2 amendment to the Format and Guidelines for the maintenan ce of the Continuous

Operational factors

1.4 In the North-Western Mediterranean, shipping traffic is mainly structured towards or
from the ports of Valencia, Tarragona, Barcelona, Marseille, Genoa, La Spezia and Livorno for
goods traffic, to which are added the ports of Toulon, Sète, Nice, Savona and all ports in the
islands of Corsica, Sardinia, the Tuscan archipelago, Sicily and the Balearic Islands for
passenger transport. This geographical situation of proximity to the islands, combined with
commercial port infrastructures, promotes maritime f erry traffic. Moreover, the cruise activity
has largely developed in the Mediterranean, benefiting from favourable weather conditions and
dedicated infrastructures: the region represents the second world market for this sector, after

has largely developed in the Mediterranean, benefiting from favourable weather conditions and dedicated infrastructures: the region represents the second world market for this sector, after the Caribbean (Di -Méglio et al., 2010). Finally, more than 700 marinas are listed in the Mediterranean basin.

Vessel types

1.5 A study conducted by the Quiet Oceans consultancy on behalf of WWF (Gallou and Folegot, 2020) analysed shipping traffic in the North -Western Mediterranean, using AIS data from 2019. In terms of distance travelled in this area, passenger ships and cargo ships travel by far the greatest distance, followed by motorized pleasure craft and fishing vessels.

Traffic characteristics

1.6 Freight traffic is higher in winter, in the northern part of the study area, along the coasts of the Gulf of Lion, towards Barcelona and with Corsica and Sardinia. Passenger traffic is highly structured around links between the main ports of France, Spain and Italy on the one hand, and Corsica, the Balearic Islands, Sardinia and the Tuscan archipelago on the other. Traffic intensity increases significantly during the summer months for passenger transport
