This work plan is indicative and may be further updated in the future, and does not prejudge the outcome of consideration on any possible changes to the short -term GHG reduction measure.1

1 This work plan does not prevent any Member State or international organization from submitting additional proposals during phase 2.

2 Possible intersessional or correspondence groups may be established by the Committee.

Date	Meeting2	Objectives
Spring 2026	MEPC 84	1. Further consider and finalize the development of the enhanced SEEMP framework 2. Further consider and finalize the development of the cgHRS metric for cruise passenger ships 3. Consider proposals to ensure synergies between the IMO carbon intensity/energy efficiency framework and the IMO net-zero framework (e.g. energy -based approach) with a view to finalization as soon as possible. Therefore, pursue incentives for energy efficiency and for the adoption of better operational practices in the shipping value chain or other technologies to reduce emissions from ships in line with the 2023 IMO GHG Strategy
Autumn 2026

incentives for energy efficiency and for the adoption of better operational practices in the shipping value chain or other technologies to reduce emissions from ships in line with the 2023 IMO GHG Strategy

Autumn 2026	MEPC 85	1. Further consider the development of other CII metrics 2. Further consider proposals to ensure synergies between the IMO carbon intensity/energy efficiency framework and the IMO net-zero framework (e.g. energy-based approach) with a view to finalization as soon as possible. Therefore, pursue incentives for energy efficiency and for the adoption of better operational practices in the shipping value chain or other technologies to reduce emissions from ships in line with the 2023 IMO GHG Strategy
Spring 2027		

MEPC 86 1. Further consider the development of other CII metrics

2. Consider further concrete proposals for CII correction factors and/or reference line adjustments, if any

3. Further consider proposals to ensure synergies between the IMO carbon intensity/energy efficiency framework and the IMO net-zero framework (e.g. energy-based approach) with a view to finalization as soon as possible. Therefore, pursue

3. Consider further concrete proposals for CII correction factors and/or reference line adjustments, as appropriate

4. Finalize phase 2 of the review

5. Further consider proposals to ensure synergies between the IMO carbon intensity/energy efficiency framework and the IMO net-zero framework, with a view to finalization as soon as possible, and develop a possible way forward for the IMO carbon intensity/energy efficiency framework beyond 2030, as appropriate. Therefore, pursue incentives for energy efficiency and for the adoption of better operational practices in the shipping value chain or other technologies to reduce emissions from ships in line with the 2023 IMO GHG Strategy

(RESOLUTION MEPC.395(82))
THE MARINE ENVIRONMENT PROTECTION COMMITTEE
RECALLING Article 38(a) of the Convention on the International Maritime Organization concerning the functions of the Marine Environment Protection Committee (the Committee) conferred upon it by international conventions for the prevention and control of marine pollution from ships,
NOTING that regulation 26 of MARPOL Annex VI requires each ship to keep on board a Ship Energy Efficiency Management Plan (SEEMP), to be developed and reviewed, taking into account the guidelines adopted by the Organization,
RECALLING that, at its eighty -second session, it adopted, by resolution MEPC.395(82), the 2024 Guidelines for the development of a Ship Energy Efficiency Management Plan (SEEMP),

account the guidelines adopted by the Organization,
RECALLING that, at its eighty -second session, it adopted, by resolution MEPC.395(82), the 2024 Guidelines for the development of a Ship Energy Efficiency Management Plan (SEEMP),
HAVING CONSIDERED, at its eighty-third session, draft amendments to the 2024 Guidelines

for the development of a Ship Energy Efficiency Management Plan (SEEMP),
1 ADOPTS amendments to the 2024 Guidelines for the development of a Ship Energy Efficiency Management Plan (SEEMP) , the text of which is set out in the annex to the present resolution;
2 INVITES Administrations to take the annexed Guidelines as amended into account when developing SEEMP Part II in accordance with the amendments to appendix IX of MARPOL Annex VI as adopted by resolution MEPC.385(81) on information to be submitted to the IMO Ship Fuel Oil Consumption Database;
3 REQUESTS the Parties to MARPOL Annex VI and other Member Governments to bring the annexed Guidelines to the attention of masters, seafarers, shipowners, ship operators and any other interested parties.
RESOLUTION MEPC.401(83) (adopted on 11 April 2025)
