ENERGY EFFICIENCY MANAGEMENT PLAN (SEEMP) (RESOLUTION MEPC.395(82))
7 GUIDANCE ON METHODOLOGY FOR COLLECTING DATA ON FUEL OIL CONSUMPTION, DISTANCE TRAVELLED AND HOURS UNDER WAY AND OTHER ITEMS
1 In paragraph 7.1, the term "boilers" is replaced by "fired boilers".
2 In the chapeau of paragraph 7.3, the term "boilers" is replaced by "fired boilers".
3 A new section "Under way and not under way" is added after the existing section "Conversion factor CF" and before the section "Distance travelled", as follows:
"Under way and not under way
7.6 Under way is defined as the period between full ahead on passage (FAOP) and end of sea passage (EOSP) as per the Guidelines for setting up a maritime single

"Under way and not under way
7.6 Under way is defined as the period between full ahead on passage (FAOP) and end of sea passage (EOSP) as per the Guidelines for setting up a maritime single window (FAL.5/Circ.42/Rev.3).
Full ahead on passage is more commonly referred to in performance monitoring systems as begin of sea passage, which is also defined in the IMO Compendium on facilitation and electronic business (IMO Compendium) under IMO 0597 (Code EV10).
"Not under way" is therefore the period between end of sea passage and full ahead on passage.
Note that canal passage, that is the period between begin canal passage (EV08) and end canal passage (EV09) which are also defined in the IMO Compendium under IMO 0597 should be considered not under way due to frequent manoeuvring, acceleration and deceleration."
Distance travelled
4 Existing paragraphs 7.6 and 7.7 are renumbered as 7.7 and 7.8 respectively, and the renumbered sub-paragraph 7.7.2 is replaced by the following:
".2 the distance travelled while the ship is under way should be included in the aggregated data of distance travelled for the calendar year; and"
Hours under way

renumbered sub-paragraph 7.7.2 is replaced by the following:
".2 the distance travelled while the ship is under way should be included in the aggregated data of distance travelled for the calendar year; and"
Hours under way
5 Existing paragraph 7.8 is renumbered as 7.9 and replaced by the following:
"7.9 Appendix IX of MARPOL Annex VI specifies that hours under way should be submitted to the Administration. Hours under way should be an aggregated duration while the ship is under way."
6 Existing paragraphs 7.9 to 7.12 are renumbered as 7.10 to 7.13 respectively.

APPENDIX 2 SAMPLE FORM OF SHIP FUEL OIL CONSUMPTION DATA-COLLECTION

PLAN (PART II OF THE SEEMP)
7 Section 4 is replaced by the following:
"4 Ship engines and other fuel oil consumers and fuel oil types used
Engines or other fuel oil
consumer type
Power Fuel oil types
1 Type/model of main engine (kW)
2 Type/model of auxiliary
engine
(kW)
3 Fired boiler ()

(adopted on 11 April 2025)
GUIDELINES FOR TEST-BED AND ONBOARD MEASUREMENTS OF METHANE (CH4) AND/OR NITROUS OXIDE (N2O) EMISSIONS FROM MARINE DIESEL ENGINES
THE MARINE ENVIRONMENT PROTECTION COMMITTEE
RECALLING Article 38(a) of the Convention on the International Maritime Organization concerning the functions of the Marine Environment Protection Committee conferred upon it by international conventions for the prevention and control of marine pollution from ships,
RECALLING ALSO that, at its eightieth session, it adopted, by resolution MEPC.377(80), the 2023 IMO Strategy on Reduction of GHG Emissions from Ships (2023 IMO GHG Strategy) setting out the levels of ambition for the international shipping sector in reducing GHG emissions,
NOTING that the 2023 IMO GHG Strategy provides that in order to support the global

setting out the levels of ambition for the international shipping sector in reducing GHG emissions,
NOTING that the 2023 IMO GHG Strategy provides that in order to support the global availability and uptake of zero or near -zero GHG emission technologies, fuels and/or energy sources, the Organization may consider and analyse measures to address emissions of methane (CH4) and nitrous oxide (N2O),
HAVING CONSIDERED, at its eighty-third session, draft guidelines for test-bed and onboard measurements of methane (CH 4) and/or nitrous oxide (N 2O) emissions from marine diesel engines,
1 ADOPTS the Guidelines for test-bed and onboard measurements of methane (CH 4) and/or nitrous oxide (N 2O) emissions from marine diesel engines , as set out in the annex to the present resolution;
2 INVITES Member States to encourage shipowners, ship operators, shipbuilders, marine diesel engine manufacturers and any other interested groups to voluntarily apply these Guidelines when undertaking measurements, calculation and reporting of CH 4 and/or N 2O emission values from marine diesel engines;
3 ALSO INVITES Member States to share data gathered in applying these Guidelines

ANNEX
GUIDELINES FOR TEST-BED AND ONBOARD MEASUREMENTS OF METHANE (CH4) AND/OR NITROUS OXIDE (N2O) EMISSIONS FROM MARINE DIESEL ENGINES
1 Introduction
1.1 The purpose of these Guidelines is to specify the protocol for test -bed and onboard measurements, calculation and reporting of methane (CH 4) and/or nitrous oxide (N 2O) emission values from marine diesel engines, as well as documentation and verification of CH4 and/or N2O emission values.
1.2 The measurements, calculations and reporting for CH 4 and/or N2O emission values
