the end of the calendar year in which the transfer takes place, calculate and report the attained annual operational CII for the full 12 -month period from 1 January to 31 December in the calendar year during which the transfer took place, in accordance with regulations 28.1 and 28.2, for verification in accordance with regulation 6.6 of this Annex, taking into account guidelines developed by the Organization. 66 Nothing in this regulation relieves any ship of its reporting obligations under regulation 27 or this regulation of this Annex.

Required annual operational carbon intensity indicator (required annual operational CII)

4 For each ship of 5,000 gross tonnage and above which falls into one or more of the categories in regulations 2.2.5 to 2.2.7, 2.2.9, 2.2.12 to 2.2.14, 2.2.20, and 2.2.24 to 2.2.27 of this Annex, the required annual operational CII shall be determined as follows:

Required annual operational CII = (1 Z100) CIIR
where,

Z is the annual reduction factor to ensure continuous improvement of the ship's operational carbon intensity within a specific rating level; and

CIIR is the reference value.

Required annual operational CII = (1 Z100) CIIR
where,

Z is the annual reduction factor to ensure continuous improvement of the ship's operational carbon intensity within a specific rating level; and

CIIR is the reference value.

5 The annual reduction factor Z 67 and the reference value CII R shall be the values defined taking into account the guidelines to be developed by the Organization.68

Operational carbon intensity rating

6 The attained annual operational CII shall be documented and verified against the required annual operational CII to determine operational carbon intensity rating A, B, C, D or E, indicating a major superior, minor superior, moderate, minor inferior or inferior performance level, either by the Administration or by any organization duly authorized by it, 69 taking into

64 Refer to the Code for Recognized Organizations (RO Code) (resolutions MSC.349(92) and MEPC.237(65)).

65 Refer to the 2022 Guidelines for Administration verification of ship fuel oil consumption data and operational carbon intensity (resolution MEPC.348(78)), as amended by resolution MEPC.389(81)).

65 Refer to the 2022 Guidelines for Administration verification of ship fuel oil consumption data and operational carbon intensity (resolution MEPC.348(78)), as amended by resolution MEPC.389(81)).

66 Refer to the 2022 Guidelines for Administration verification of ship fuel oil consumption data and operational carbon intensity (resolution MEPC.348(78)), as amended by resolution MEPC.389(81)).

67 The annual reduction factor is specific to each category of ship. This factor is defined to increase progressively to meet the objectives of the Initial IMO Strategy on reduction of GHG emissions from ships (resolution MEPC.304(72)).

68 Refer to the 2021 Guidelines on the operational carbon intensity reduction factors relative to reference lines (CII reduction factor guidelines, G3) (resolution MEPC.338(76), as amended by resolution MEPC.400(83)) and the 2022 Guidelines on the reference lines for use with operational carbon intensity indicators (CII reference lines guidelines, G2) (resolution MEPC.353(78)).

69 Refer to the Code for Recognized Organizations (RO Code) (resolutions MSC.349(92) and MEPC.237(65)).

reference lines guidelines, G2) (resolution MEPC.353(78)).

69 Refer to the Code for Recognized Organizations (RO Code) (resolutions MSC.349(92) and MEPC.237(65)).
RESOLUTION MEPC.403(83) (adopted on 11 April 2025)

account the guidelines developed by the Organization.70 The middle point of rating level C shall be the value equivalent to the required annual operational CII set out in paragraph 4 of this regulation.

Corrective actions and incentives

7 A ship rated as D for three consecutive years or rated as E shall develop a plan of corrective actions to achieve the required annual operational CII.

8 The SEEMP shall be reviewed to include the plan of corrective actions accordingly , taking into account the guidelines to be developed by the Organization.71 The revised SEEMP shall be submitted to the Administration or any organization duly authorized by it 72 for verification, preferably together with, but in no case later than 1 month after reporting the

shall be submitted to the Administration or any organization duly authorized by it 72 for verification, preferably together with, but in no case later than 1 month after reporting the
attained annual operational CII in accordance with paragraph 2 of this regulation.

9 A ship rated as D for three consecutive years or rated as E shall duly undertake the planned corrective actions in accordance with the revised SEEMP.

10 Administrations, port authorities and other stakeholders as appropriate, are encouraged to provide incentives to ships rated as A or B.

Review

11 This regulation shall be kept under review in light of its implementation, taking into account the IMO Strategy on Reduction of GHG Emissions from Ships.

Regulation 29
Promotion of technical cooperation and transfer of technology relating to the improvement of energy efficiency of ships73

1 Administrations shall, in cooperation with the Organization and other international bodies, promote and provide support, as appropriate, directly or through the Organization to States that request technical assistance, especially developing States.

Chapter 5 Regulations on the IMO Net-Zero Framework

Regulation 30
Application

1 This chapter shall apply to all ships of 5,000 gross tonnage and above.

2 Notwithstanding paragraph 1 of this regulation, the provisions of this chapter shall not apply to:

.1 ships solely engaged in voyages within waters subject to the sovereignty or jurisdiction of the State the flag of which the ship is entitled to fly. However, each Party should ensure, by the adoption of appropriate measures, that
