service to a manifold inside the device), and diver excursion umbilicals terminated at the device.

4 Alternative arrangements

In order that research and development is not restricted by the 2023 Diving Code, an Administration may accept alternative arrangements which embody features, or designs, of a novel kind. Any diving unit for which such arrangements have been accepted should provide for an equivalent level of safety which, in the opinion of that Administration, is satisfactory for the operation intended and will ensure the overall safety of the diving unit and diving operation. Any such alternative arrangements accepted by the Administration should be documented on the Certificate.

5 Surveys and certification

5.1 A diving unit represents the integration of a diving system onto or into a diving platform. As the diving system and diving platform may be owned/operated by different parties,

platform. As the diving system and diving platform may be owned/operated by different parties, a two-part certification process is used with Part I of the Certificate for the diving unit and Part II for the diving system. A model form of the Certificate is presented at appendix 2.

5.2 Every diving unit should be subject to the surveys specified below:

.1 An initial survey before any diving unit is put into service or before the Certificate required under this section of this Code is issued for the first time, which should include a complete and thorough verification of the diving systems integration an d arrangement with the diving platform.
The integration of a diving organization 's occupational health and safety management system, provision of essential services and diving system

limitations listed in Part II of the Certificate are to be verified, as well as the

suitability of the life -saving arrangements and the functionality of the whole diving unit.

.2 Where a diving system has already been certified to the provisions of this Code, the status of that certification should be confirmed to be acceptable to the Administration.

.3 Where the DUSC Part II requires an installation survey by the certifying authority of the diving system, this should be completed prior to issuing the DUSC Part I.

.4 Where an existing diving system is not certified in accordance with the Code of Safety for Diving Systems, 1995 (resolution A.831(19)), a DUSC Part II may be issued with validity no longer than 1 January 2029 clearly stating which provisions under 4.3.3 of the Code cannot be confirmed as alternative

which provisions under 4.3.3 of the Code cannot be confirmed as alternative arrangements for the consideration of the Administration issuing Part I.

.5 A renewal survey at intervals specified by the Administration, but not exceeding five years, which should be a complete and thorough verification to ensure that the diving unit, including the diving system, fully complies with the applicable provisions of this Code.

.6 An annual survey within three months before or after each anniversary date of the Certificate so as to ensure that the diving unit, including the diving system, remains in compliance with the applicable provisions of this Code and are in good working or der. Such annual survey should be endorsed on the Part I of the Certificate issued under the provisions of this section.

5.3 Every diving system forming part of a diving unit should be subject to the surveys specified below:

5.3 Every diving system forming part of a diving unit should be subject to the surveys specified below:

.1 An initial survey before being put into service as part of a diving unit or before Part II of the Certificate required under this section of this Code is issued for the first time, which should include verification of the diving system, equipment, fittings, arrangements and material and which should be such as to ensure their full compliance with the applicable provisions of this Code.

.2 A renewal survey at intervals specified by the certifying authority, but not exceeding five years, which should be a complete and thorough examination to ensure that the diving system, equipment, fittings, arrangements and material fully comply with the applicable provisions of this Code.

.3 Where an existing diving system has already been certified in accordance with the Code of Safety for Diving Systems, 1995 (resolution A.831(19)), as

with the Code of Safety for Diving Systems, 1995 (resolution A.831(19)), as amended) then this certification may be accepted as the basis of the DUSC Part II.
.4 Where an existing diving system is not certified in accordance with the Code of Safety for Diving Systems, 1995 (resolution A.831(19)), a DUSC Part II may be issued with validity no longer than 1 January 2029 and clearly stating the circumstances under which the Administration considers it acceptable to issue the DUSC Part II. The DUSC Part II should also state which provisions under 4.3.3 of this Code cannot be confirmed as alternative arrangements for the consideration of the Administration issuing Part I of the DUSC.

.5 An annual survey within three months before or after each anniversary date

.5 An annual survey within three months before or after each anniversary date of the Certificate so as to ensure that the diving system, fittings, arrangements, safety equipment and other equipment remain in compliance with the applicable provisions of thi s Code and are in good working order. Such annual survey should be endorsed on Part II of the Certificate issued under the provisions of this section.

.6 When a temporary diving system is demobilized, the surveys above may be carried out as far as practicable and endorsed on the Certificate as above. However, upon a remobilization all surveys that were not practicable to carry out while demobilized shoul d be completed and Part II of the Certificate endorsed accordingly.

5.4 An inspection, either general or partial according to the circumstances, should be made every time a defect is discovered or an accident occurs which affects the safety and

made every time a defect is discovered or an accident occurs which affects the safety and certification of the diving system or whenever a significant repair or alteration is made. The inspection should be such as to ensure that the repairs or alterations carried out have been done effectively and are in all respects in full compliance with the applicable provisions of this Code.

5.5 Surveys and inspections should be carried out by officers of the Administration. The Administration may, however, entrust the surveys either to surveyors nominated for the purpose or to organizations recognized by it. In every case the Administration c oncerned should fully guarantee the completeness and efficiency of the surveys.

5.6 After any survey or inspection under this section has been completed, no significant change should be made in the diving unit without the agreement of the Administration or any

change should be made in the diving unit without the agreement of the Administration or any person or organization duly authorized by it, except the replacement of equipment and fittings to the equivalent specification for the purpose of repair or maintenance.

5.7 After survey or inspection, a Certificate should be issued either by the Administration or any person or organization duly authorized by it after survey or inspection to a diving unit which complies with the provisions of this Code. In every case the A dministration should assume full responsibility for the Certificate.

5.8 The Certificate should be drawn up in the official language of the Administration in the form corresponding to the model given in appendix 2 to this Code. If the language used is neither English, French nor Spanish, the text should include a translatio n into one of these languages.

5.9 Any alternative arrangements granted under section 4 above should be clearly noted
