Use of simulators
General performance standards for simulators used in training
1 Each Party shall ensure that any simulator used for simulator-based training shall:
.1 be suitable for the selected objectives and training tasks;
.2 be capable of simulating the operating capabilities of shipboard equipment concerned, to a level of physical realism appropriate to training objectives, and include the capabilities, limitations and possible errors of such equipment;
.3 have sufficient behavioural realism to allow a trainee to acquire the skills appropriate to the training objectives;
.4 provide a controlled operating environment capable of producing a variety of conditions, which may include emergency, hazardous or unusual situations relevant to the training objectives;

relevant to the training objectives;

.5 provide an interface through which a trainee can interact with the equipment, the simulated environment and, as appropriate, the instructor; and
.6 permit an instructor to control, monitor and record exercises for the effective debriefing of the trainees.

General performance standards for simulators used in assessment of competence

2 Each Party shall ensure that any simulator used for the assessment of competence required under the Convention or for any demonstration of continued proficiency so required shall:
.1 be capable of satisfying the specified assessment objectives;
.2 be capable of simulating the operational capabilities of the shipboard equipment concerned to a level of physical realism appropriate to the

.2 be capable of simulating the operational capabilities of the shipboard equipment concerned to a level of physical realism appropriate to the assessment objectives, and include the capabilities, limitations and possible errors of such equipment;
.3 have sufficient behavioural realism to allow a candidate to exhibit the skills appropriate to the assessment objectives;
.4 provide an interface through which a candidate can interact with the equipment and simulated environment;
.5 provide a controlled operating environment, capable of producing a variety of conditions, which may include emergency, hazardous or unusual situations relevant to assessment objectives; and
.6 permit an assessor to control, monitor and record exercises for the effective assessment of the performance of candidates.

Additional performance standards

3 In addition to meeting the basic requirements set out in paragraphs 1 and 2, simulation

Additional performance standards

3 In addition to meeting the basic requirements set out in paragraphs 1 and 2, simulation equipment to which this section applies shall meet the performance standards given below in accordance with their specific type.

Radar simulation

4 Radar simulation equipment shall be capable of simulating the operational capabilities of navigational radar equipment which meets all applicable performance standards adopted by the Organization and incorporate facilities to:
.1 operate in the stabilized relative -motion mode and sea - and

ground-stabilized true-motion modes;
.2 model weather, tidal streams, current, shadow sectors, spurious echoes and other propagation effects, and generate coastlines, navigational buoys and search and rescue transponders; and
.3 create a real -time operating environment incorporating at least two own-vessel stations with ability to change the own vessel's course and

.3 create a real -time operating environment incorporating at least two own-vessel stations with ability to change the own vessel's course and speed, and include parameters for at least 20 target vessels and appropriate communication facilities.

Simulator training objectives
5 Each Party shall ensure that the aims and objectives of simulator -based training are defined within an overall training programme and that specific training objectives and tasks are selected so as to relate as closely as possible to shipboard tasks and practices.
Training procedures
6 In conducting simulator-based training, instructors shall ensure that:
.1 trainees are adequately briefed beforehand on the exercise objectives and tasks and are given sufficient planning time before the exercise starts;

tasks and are given sufficient planning time before the exercise starts;
.2 trainees have adequate familiarization time on the simulator and with its equipment before any training or assessment exercise commences;
.3 guidance given and exercise stimuli are appropriate to the selected exercise objectives and tasks and to the level of trainee experience;
.4 exercises are effectively monitored, supported as appropriate by audio and visual observation of trainee activity and pre - and post-exercise evaluation reports;
.5 trainees are effectively debriefed to ensure that training objectives have been met and that operational skills demonstrated are of an acceptable standard;
.6 the use of peer assessment during debriefing is encouraged; and
.7 simulator exercises are designed and tested so as to ensure their suitability for the specified training objectives.
Assessment procedures
7 Where simulators are used to assess the ability of candidates to demonstrate levels

for the specified training objectives.
Assessment procedures

7 Where simulators are used to assess the ability of candidates to demonstrate levels of competency, assessors shall ensure that:
.1 performance criteria are identified clearly and explicitly and are valid and available to the candidates;
.2 assessment criteria are established clearly and are explicit to ensure reliability and uniformity of assessment and to optimize objective measurements and evaluation, so that subjective judgements are kept to the minimum;
.3 candidates are briefed clearly on the tasks and/or skills to be assessed and on the tasks and performance criteria by which their competency will be determined;
.4 assessment of performance takes into account normal operating procedures and any behavioural interaction with other candidates on the simulator or with simulator staff;
.5 scoring or grading methods to assess performance are used with caution until they have been validated; and

with simulator staff;
.5 scoring or grading methods to assess performance are used with caution until they have been validated; and
.6 the prime criterion is that a candidate demonstrates the ability to carry out a task safely and effectively to the satisfaction of the assessor.

Section A-I/12
Medical standards
1 Parties, when establishing standards of medical fitness for fishing vessel personnel as required by regulation I/12, shall adhere to the minimum in -service eyesight standards set out in table A-I/12 and take into account the criteria for physical and medical fitness set out in paragraph 2. They should also take into account the guidance given in section B -I/12 of this Code and the Guidelines on the medical examination of fishing vessel personnel . These
