10.2.2 Use of nitrogen as an inert gas3
Nitrogen is a colourless and odourless gas that, when used as an inert gas, causes oxygen deficiency in enclosed spaces and at exhaust openings on deck during purging of tanks and void spaces and use in cargo holds. It should be noted that one deep breath of 100% nitrogen gas will prove fatal.
10.3 Solid bulk
On ships carrying solid bulk cargoes, dangerous atmospheres may develop within cargo spaces, connected and adjacent spaces. The hazards may include flammability, toxicity, oxygen depletion, carbon dioxide and/or carbon monoxide generation, or self -heating, as identified in the shipper's declaration and/or in the individual schedules in appendix 1 of the IMSBC Code. Solid bulk cargoes listed in the IMSBC Code should be carried in accordance with the provisions of the Code, including precautions, atmosphere t esting, ventilation and other requirements specified. Solid bulk cargoes that are not listed in the IMSBC Code should

other requirements specified. Solid bulk cargoes that are not listed in the IMSBC Code should be carried in accordance with section 1.3 of the Code, including the conditions for carriage and handling as determined by the relevant co mpetent authorities. Grain cargoes and timber cargoes other than those listed in the IMSBC Code 4 may also cause oxygen depletion and toxic gas emissions, primarily carbon dioxide, in cargo holds and connected and adjacent spaces.
10.3.1 Enclosed hold access trunks
10.3.1.1 In certain designs of hold access, a stair arrangement, sometimes referred to as the "Australian Ladder", substitutes for a vertical ladder. On some ships these are contained within enclosed protective structures that are open only at the top and bottom o f the hold. When a cargo that presents the risk of a hazardous atmosphere is loaded, this "connected" space will quickly adopt atmospheric attributes similar to that of the source space. The enclosed
---

quickly adopt atmospheric attributes similar to that of the source space. The enclosed Australian ladder access should not be used unti l it has been fully ventilated, tested and confirmed to be safe. It should be noted that such spaces are difficult to ventilate, unless cargo blocking the bottom of the ladder is removed.
10.3.1.2 When hatches are opened to ventilate the above cargo space at discharge, the hazardous atmosphere often gets trapped in the access trunk.
2 16.2.3.1 of the IBC Code and 18.3.1 of the IGC Code.
3 Refer to the Guidelines on tank entry for tankers using nitrogen as an inerting medium (MSC.1/Circ.1401).
4 Refer to the International Code for the Safe Carriage of Grain in Bulk (resolution MSC.23(59) (amended by resolution MSC.552(108)) and the Code of Safe Practice for Ships Carrying Timber Deck Cargoes, 2011 (resolution A.1048(27)).

THE MARITIME SAFETY COMMITTEE,
RECALLING article 1(a) of the Convention on the International Maritime Organization, according to which the purpose of the Organization is to provide machinery for cooperation among Governments in the field of governmental regulation and practices relating to technical matters of all kinds affecting shipping engaged in international trade; to encourage and facilitate the

of all kinds affecting shipping engaged in international trade; to encourage and facilitate the general adoption of the highest practicable standards in matters concerning the maritime safety, efficiency of navigation and prevention and control of marine pollution from ships; and to deal with administrative and legal matters related to the purposes set out in this article,
RECALLING ALSO that the mission of the International Maritime Organization (IMO), as a United Nations specialized agency, is to promote safe, secure, environmentally sound, efficient and sustainable shipping through cooperation,
REAFFIRMING the principles enshrined in the International Convention for the Safety of Life at Sea, the International Convention on Maritime Search and Rescue, and other international instruments establishing cooperation among States,
TAKING INTO ACCOUNT the importance of maritime domain awareness, and the need to

instruments establishing cooperation among States,
TAKING INTO ACCOUNT the importance of maritime domain awareness, and the need to improve coordination and information exchange among Member States, international organizations and stakeholders in order to assist in the fight against organized crime threats in the maritime sector,
RECALLING resolution A.1190(33) on Enhancing the framework on the fight against organized crime in the maritime sector , inviting Member States to share with the Organization the strategies that, in their experience, have worked to mitigate the impacts of organized crime on international maritime traffic and port facilities,

RECOGNIZING the existence and fundamental role of national and regional maritime information-sharing centres, which facilitate coordination and cooperation, threat analysis and informed decision-making in matters of maritime safety and security, which will contribute to

informed decision-making in matters of maritime safety and security, which will contribute to
the safety, security, prevention and resilience of the sector, noting the important role of the human element in the maritime traffic to the Organization and its Member States,
CONCERNED ABOUT threats of organized crime , which are detrimental to Member States and industry by weakening governance, harming the economy and generating violence,
1 ENCOURAGES sharing of relevant information, including data on maritime safety and security, illicit activities in the maritime sector, environmental incidents and search and rescue situations, to include the use of national and regional maritime information-sharing centres;
2 REQUESTS the IMO Secretariat to work with Member States and relevant international organizations to promote training initiatives, exchange of best practices and technical assistance in order to enhance the sharing of information related to maritime safety and security.

3. STRONGLY URGES Contracting Governments to the Convention to meet their obligations under SOLAS regulation XI-1/5 and resolution A.959(23) and, in particular, when a ship entitled to fly their flag is transferred to the flag of another Contracting Government to the Convention, to forward to it the Continuous Synopsis Record of the ship as soon as possible and within the time frame prescribed in resolution A.959(23), as amended, so as to enable the latter Government to promptly issue to the ship the required Continuous Synopsis Record;

4. INVITES Contracting Governments to the Convention to bring to its attention any difficulties encountered with the implementation of the provisions of SOLAS regulation XI-1/5 or of resolution A.959(23) as amended for consid eration of the issues involved and decision on the actions to be taken.

ANNEX 1

AMENDMENTS TO THE FORMAT AND GUIDELINES FOR THE MAINTENANCE
OF THE CONTINUOUS SYNOPSIS RECORD (CSR) (RESOLUTION A.959(23))

Issue of revised and updated CSR documents by the Administration

1 The existing paragraph 8 is replaced by the following text:

“In the case of a change of flag, the previ ous flag State has to issue a new CSR document to the ship showing the date the ship ceased to be registered with that flag State. That flag State is required to se nd a copy of the ship’s CSR file, as soon as possible and preferably not later than one m onth from the date the ship ceas ed to be registered, to the new flag State. The new flag State is requ ired to issue a new CSR document as soon as
