5 Operational carbon intensity indicator (CII) of individual ships for trial purpose

The following metrics are encouraged to be used for trial purposes, where applicable:

.1 Energy Efficiency Performance Indicator (EEPI)

ship energy efficiency operational indicator (EEOI).

In the formulas above:

the mass of CO2 (M), the ships capacity (C) and the total distance travelled (Dt) are identical with those used to calculate the attained CII of individual ships, as specified in section 4.1 and 4.2;

DI means the laden distance travelled (in nautical miles) when the ship is loaded;

ALB means the number of available lower berths of a cruise passenger ship; and

Lanemeter means the length (in metres) of the lanes of a ro-ro ship.
