The SRP should also contain additional information on the management of Hazardous Materials as required in Appendix 5 of the Convention (also known as the DASR). Specifically, the SRP should describe where the Hazardous Materials are to be processed or disposed of if the operation is not being conducted at the Ship Recycling Facility. The SRP should state that the removal of Hazardous Materials will be undertaken by responsible personnel who are trained and authorized to do so.

4.4 Safe-for-entry and Safe-for-hot-work procedures

Regulation 9 of the Convention requires the SRP to include information concerning the establishment, maintenance and monitoring of Safe-for-entry and Safe-for-hot-work procedures. The Ship Recycling Facility is encouraged to review the Facility Guidelines, as they contain specific technical recommendations to address these important safety issues.

While the SRFP will describe general procedures on how the Ship Recycling Facility will achieve safe atmospheric conditions during the ship recycling process, the SRP should

While the SRFP will describe general procedures on how the Ship Recycling Facility will achieve safe atmospheric conditions during the ship recycling process, the SRP should describe in detail how Safe-for-entry and Safe-for-hot-work procedures will be implemented on the specific ship, taking account of such features as its structure, configuration, and previous cargo.

4.5 Dismantling sequence

An important component of the dismantling sequence is the removal of Hazardous Materials to the maximum extent practicable prior to and during cutting activities. Depending on a number of factors, including the age of the ship and the quantity of Hazardous Materials present, it may be impossible to remove all Hazardous Materials prior to the start of cutting activities. The SRP should include a dismantling sequence that is ship-specific and takes into account the cutting operations and locations of Hazardous Materials.

4.6 Other necessary elements

activities. The SRP should include a dismantling sequence that is ship-specific and takes into account the cutting operations and locations of Hazardous Materials.

4.6 Other necessary elements

In addition to the elements described above, the SRP should include any ship specific processes and/or procedures that will be necessa ry to recycle the ship and that are not fully

covered in the SRFP. For example, a Ship Recycling Facility may need to use additional workers or subcontractors, or they may need additional equipment to deal with unique aspects of the ship. Such ship-specific processes/procedures may take into account the technical guidance manual to be developed by the Organization.

4.7 Attaching a copy of DASR

The Ship Recycling Facility should attach a copy of the DASR to the SRP.

5 VERIFICATION OF COMPETENT AUTHORITY APPROVAL

Article 16.6 of the Convention stipulates that a State shall declare whether it requires tacit or explicit approval of the SRP before a ship may be recycled. The Ship Recycling Facility should be familiar with the procedures implemen ted by the Competent Authority for approval

explicit approval of the SRP before a ship may be recycled. The Ship Recycling Facility should be familiar with the procedures implemen ted by the Competent Authority for approval of the SRP. The Competent Authority's approval process will, at a minimum, include written acknowledgement of receipt of the SRP and may include further written documentation of approval or denial for the ship-specific recycling. The written acknowledgement and/or documentation of approval should be appended to the SRP immediately upon availability and made available to appropriate authorities and stakeholders as necessary.

SAMPLE COVER PAGE

Ship Recycling Plan
Summary of information on ship and Ship Recycling Facility

This Ship Recycling Plan was developed in accordance with the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009 (the Convention).

Ship information
Name of ship
Distinctive number or letters
Port of registry
Gross tonnage
IMO number

Convention for the Safe and Environmentally Sound Recycling of Ships, 2009 (the Convention).

Ship information
Name of ship
Distinctive number or letters
Port of registry
Gross tonnage
IMO number
Name and address of shipowner
IMO-registered owner identification number

IMO company identification number

Telephone number
E-mail address

Ship Recycling Facility information
Name of Ship Recycling Facility
Distinctive Recycling Company identity No.

Full address of Ship Recycling Facility

Primary contact person
Telephone number
E-mail address
Name, address and contact information of ownership company

Working language(s)

Projected schedule for ship recycling
Date of ship arrival at Ship Recycling Facility
Date of commencement of ship recycling
Date of Completion of ship recycling
Date of completion of sale/disposal of all components

(Date) (Signature of Ship Recycling Facility owner/operator)
