B-5 Polybrominated biphenyl (PBBs) x 1,000 mg/kg
B-6 Polybrominated diphenyl ethers (PBDEs) x 1,000 mg/kg
B-7 Polychlorinated naphthalenes (more than 3 chlorine atoms) x no threshold level
B-8 Radioactive substances x no threshold level§
B-9 Certain shortchain chlorinated paraffins (Alkanes, C10-C13, chloro) x 1%

B-8 Radioactive substances x no threshold level§
B-9 Certain shortchain chlorinated paraffins (Alkanes, C10-C13, chloro) x 1%

* For materials in this Table with no threshold leve l, quantities occurring as unintentional trace contaminants should not be listed in Material Declarations and in the Inventory.
§ However, note that, in order to identify amounts of radioactive substances which could be exempted from the need for regulatory control, "exemption criteria" were established in the IAEA Safety Standards (Safety Series No.115, International Basic Safety Standards for the Protection against Ionizing Radiation and for the Safety of Radiation Sources, Schedule I, p. 81-89; Vienna, 1996. I AEA is currently in the process of updating IAEA Safety Series No.115). For practical purposes, the IAEA defined va lues (e.g., "exemption levels") that could be considered as "thresholds" below which the substanc es could be automatically exempted from any control without further consider ation. National Regulatory Authorities normally establish exemption levels for radioactive sources and other radioactive materials.
