Footnote: The alphabetical reference letters in the above format are from "General principles for ship reporting systems and ship reporting requirements, including guidelines for reporting incidents involving dangerous goods, harmful substances and/or marine pollutants" adopted by the International Maritime Organization by resolution A.648(16).

The letters do not follow the complete alphabetical sequence as certain letters are used to designate information required for other standard reporting formats, e.g., those used to transmit route information.

2.3 Who to contact

This section should refer the Plan user to Appendices separately listing contacts for the following:

coastal State contacts (see section 2.4.2 of the Guidelines);

port contacts (see section 2.4.3 of the Guidelines); and

ship interest contacts (see section 2.4.4 of the Guidelines),

Examples of how this information could be depicted are included in the appendices.

SECTION 3: STEPS TO CONTROL DISCHARGE

3 This section should ensure that the prov1s10ns of regulation 26 of Annex 1 of MAR POL 73/78 regarding steps to control discharge are complied with and should include information relating to the following:

3.1 Ope r ational spills

This section should contain ship-specific information concerning actions to be taken in response to operational spills (see section 2.5.2.1). As a minimum, procedures to address spills resulting from pipe leakage, tank overflow and hull leakage should be included.

3.2 Spills resulting from casualties

This section should contain ship-specific and company-specific information concerning actions to be taken to address, as a minimum, the following casualty scenarios: grounding, fire/explosion,

be included.

3.2 Spills resulting from casualties

This section should contain ship-specific and company-specific information concerning actions to be taken to address, as a minimum, the following casualty scenarios: grounding, fire/explosion,

collision, hull failure, excessive list (see section 2.5.2.2 of the Guidelines). This section should also provide guidance on priority actions to be taken (see Section 2.5 of the Guidelines).

Consideration should be given to providing some of the necessary

information in the form of checklists/flowcharts where considered applicable. An example of presentation of information relating to response activities and personnel responsibilities is given in table 2 below:

Operational Designated Crew Member
spi 11 type Action to be taken (State rank/rating only)
Pipe leakage Stop product flow Chi ef Offi cer
~ ~----- / -~-
c
-- ..... -

Where appropriate this section should provide a list of information required for making damage stability and damage longitudinal strength assessments.

SECTION 4: NATIONAL AND LOCAL CO-ORDINATION

4 This section should contain information to assist the master in

required for making damage stability and damage longitudinal strength assessments.
SECTION 4: NATIONAL AND LOCAL CO-ORDINATION

4 This section should contain information to assist the master in initiating action by coastal State, local government or other involved parties (see section 2.6 of the Guidelines). Dependent on the ship's trade, this Section should include information and guidance to assist the master with organizing a response to the incident should such response not be organized by shore authorities. Detailed information for specific areas may be included as appendices to the Plan.

SECTION 5: ADDITIONAL INFORMATION (NON-MANDATORY)

5 This section should contain additional information included in the Plan at the owners' discretion. This information, although not required by regulation 26 of MAR POL 73/78, Annex 1, may be required by local authorities in ports visited by the vessel, or it may be included to provide additional

at the owners' discretion. This information, although not required by regulation 26 of MAR POL 73/78, Annex 1, may be required by local authorities in ports visited by the vessel, or it may be included to provide additional assistance to the ship's master when responding to an emergency situation. This information may include (see section 3 of the Guidelines):

plan review procedures;
training and drill procedures;
record-keeping procedures;
public affairs policy of the owners/operators;

etc.
(See section 3 of the Guidelines.)
