these Guidelines and Specifications, where ' applicable, should be shown on the environmental test protocol issued by the testing laboratory. The protocol should include at least the following details:

.1 identification of the equipment by type and drawing number, duly dated; and

.2 a statement of the tests conducted on the equipment, including the results thereof.

5.2.2 The environmental test protocol should be endorsed by either the Administration or a competent authority of the manufacturer's home country to confirm that the laboratory is approved to conduct such tests. The protocol should also be signed and dated by the person in charge of the laboratory.

NAME. OF ADMINISTRATION

CERTIFICATE OF TYPE APPROVAL FOR OIL FILTERING EQUIPMENT
(15 ppm equipm~ nt)

This is to certify that tne.equipment listed pelow has been examined and tested in accordance with the r~quir~ment~ ~f the Specifications contained in part 1 of the an,nex to the Guidelines and' Specifications contained in .IMO resolution HE PC (33). This Certificate is valid only for equipment r.eferred to below.

Equipment supplied by ..... " ... .. "" ..... ' ..... III, ..... ..
under type and model designation
and incorporating:
*Equipment manufactured by .. .. ..... ... .. .. .... ..... .... .. .. .. ..... ,. ..... .... .
to specification/assembly drawing No.. '.' ~ date ... ...
*Coalescer manufactured by . .....

to specification/assembly drawing No . ~ ~,
Control equipment manufactured by ..... ,. ..... . ) i'" " . .
to specification/assembly drawing ~Q III ..... III, ~ "
Maximum throughput of system ..... .. ..... m3/h .
The equipment has been tested with residual oil having a relative density
of not less than 0.94* or 0.98* at 15°C.
If integral feed pump is not fitted state method proposed for ensuring maximum
throughput of system is not exceeded.
A copy of this Certificate should be carried aboard a vessel fitted with this
equipment at all times.
Limiting Conditions imposed
Test data and results attached in the appendix
