between the ships position and the information supplied by the position-fixing equipment available to them. Information on course and speed will help operators to identify one ship among a group of ships. This will be achieved automatically if AIS transponder is used.

All VHF-, telephone-, radar-, AIS- and other relevant information will be recorded and the records stored for 30 days.
RESOLUTION MSC.139(76)
(adopted on 5 December 2002)
MANDATORY SHIP REPORTING SYSTEMSMSC 76/23/Add.1
ANNEX 13
Page 5

I:\MSC\76\23-ADD.1.DOC

3.3 Geographical position for submitting reports

3.3.1 Eastbound traffic should make a report to TALLINN TRAFFIC when crossing the line drawn from Bengtskär Lighthouse to 59 °33.30N 022°30E to 59°10N 021 °30E to Kpu Peninsula or when entering the ship reporting area from south.

3.3.2 Westbound traffic should make a short report to HELSINKI TRAFFIC when crossing longitude 026°30E or when entering the ship reporting area from north.

3.3.3 A full report to the nearest shore station should be made on departure from port.

3.3.4 Further reports should be made to the relevant shore station whenever there is a change of

3.3.3 A full report to the nearest shore station should be made on departure from port.

3.3.4 Further reports should be made to the relevant shore station whenever there is a change of navigational status or circumstance, particul arly in relation to items Q and R of the reporting format.

3.4 Crossing traffic

3.4.1 Reports to the nearest shore station should be made on departure from a port within the coverage area. Recognizing that ferries cr ossing between Helsinki and Tallinn generally operate according to published schedules, speci al reporting arrangements can be made on a ship-by-ship basis, subject to the approval of both HELSINKI TRAFFIC and TALLINN TRAFFIC.

3.4.2 Further reports should be made to the relevant shore station whenever there is a change of navigational status or circumstance, particul arly in relation to items Q and R of the reporting format.

3.4.3 On the area between Helsinki and Tallinn Light houses there is a heavy crossing traffic in summer consisting mostly of high speed craft and recreational craft. In the area between Porkkala Lighthouse and Naissaar there are recreational sailing activities in summer.

3.5 Authority

---CHUNK---

summer consisting mostly of high speed craft and recreational craft. In the area between Porkkala Lighthouse and Naissaar there are recreational sailing activities in summer.

3.5 Authority

3.5.1 The shore-based Authorities are:

Estonia: Estonian Maritime Administration
Finland: Finnish Maritime Administration
Russian Federation: Russian Maritime Administration

3.5.2 The Estonian, Finnish and Russian Authorities monitor shipping within the mandatory ship reporting area of the Gulf of Finland by ra dar. This does not relieve ship masters of their responsibility for the navigation of their ship.

4 INFORMATION TO BE PROVIDED TO PARTICIPATING SHIPS AND PROCEDURES TO BE FOLLOWED

4.1 Information provided

4.1.1 Each Authority provides information to sh ipping about specific and urgent situations which could cause conflicting traffic movements and other information concerning safety

of navigation, for instance information about weather, ice, water level, navigational

---CHUNK---

of navigation, for instance information about weather, ice, water level, navigational problems or other hazards. Information is broadcast on the following frequencies when necessary or on request.

Station	Frequency	Times	Additional broadcasts in wintertimes
Tallinn	VHF channel 61	working channel 81	on request or when needed
		on request or	when needed
Helsinki	VHF channel 60	working channel 80	on request or when needed
		on request or	when needed
St. Petersburg	VHF channel 74	working channel 10	on request or when needed
		on request or	when needed

4.1.2 Information broadcasts will be preceded by an announcement on VHF channel 16 on which channel it will be made. All ships na vigating in the area should listen to the announced broadcast.

4.1.3 If necessary, individual information can be pr ovided to a ship, particularly in relation to positioning and navigational assistance or local conditions. If a ship needs to anchor due

announced broadcast.

4.1.3 If necessary, individual information can be pr ovided to a ship, particularly in relation to positioning and navigational assistance or local conditions. If a ship needs to anchor due to breakdown or emergency the operator can recommend suitable anchorage in the area.

4.2 Ice routeing in winter

4.2.1 During severe ice conditions the traffic se paration schemes may be declared not valid. Such a decision is agreed jointly by the National Icebreaking Authorities and communicated to shipping with the daily ice reports. The decision may include all or a named traffic separation scheme.

4.2.2 During the period when the Gulf of Finla nd is covered by ice, ships reporting to the centre, will receive information on the r ecommended route through the ice and/or are requested to contact the national co-ordinati ng icebreaker for further instructions. The icebreaker gives the route according to the ice situation to the ships which fulfill the national ice class regulations and which are fit for winter navigation.

4.3 Deviations

4.3.1 If a ship participating in the mandatory ship reporting system fails to appear on the radar
