selection should include fore where fitted (see 4.3)
and aft peak tanks and three
other tanks) (see 4.2)
Overall survey of at least two As for renewal survey given
representative cargo tanks in annex 1
Close-up survey in salt water As for renewal survey given
ballast tanks of: in annex I
- all web frames (1) in one
complete tank (see Note 1) -
the knuckle area and the
upper part (5 m
approximately) of one web
frame in each remaining
ballast tank (6)
- one transverse bulkhead (4)

ballast tanks of: in annex I
- all web frames (1) in one
complete tank (see Note 1) -
the knuckle area and the
upper part (5 m
approximately) of one web
frame in each remaining
ballast tank (6)
- one transverse bulkhead (4)
in each complete tank (see
Note 1) (see 4.2.3)
Close-up survey in two cargo As for renewal survey given
tanks (or two combined in annex I
cargolballast tanks, where
fitted):
the extent of survey should be
based on the records of the
previous renewal survey and
repair history of the tanks
(see 4.3)
Thickness measurements of Thickness measurements of As for renewal survey given
those areas found to be those areas found to be in annex 2
suspect areas, as defined in suspect areas, as defined in
1.2.7, at the previous renewal 1.2.7, at the previous renewal
survey (see 4.3.5) survey (see 4.3.5)
RESOLUTION MSC.197(80)
(adopted on 20 May 2005)
AMENDMENTS TO THE GUIDELINES ON THE ENHANCED
PROGRAMME OF INSPECTIONS DURING SURVEYS OF BULK CARRIERS
AND OIL TANKERS (RESOLUTION A.744(18), AS AMENDED)- 54-
Notes:
(1), (4) and (6) are areas to be subjected to close-up surveys and thickness measurements (see
appendix 3 of annex 3).

PROGRAMME OF INSPECTIONS DURING SURVEYS OF BULK CARRIERS
AND OIL TANKERS (RESOLUTION A.744(18), AS AMENDED)- 54-
Notes:
(1), (4) and (6) are areas to be subjected to close-up surveys and thickness measurements (see appendix 3 of annex 3).
(1) Web frame means vertical web in side tank, hopper web in hopper tank, floor in double bottom tank and deck transverse in double deck tank (where fitted), including adjacent structural members. In fore and aft peak tanks web frame means a complete transverse web frame ring including adjacent structural members.
(4) Transverse bulkhead complete in ballast tanks, including girder system and adjacent structural members, such as longitudinal bulkheads, girders in double bottom tanks, inner bottom plating, hopper side, inner hull longitudinal bulkhead, connecting brackets.
(6) The knuckle area and the upper part (5 metres approximately), including adjacent structural members. Knuckle area is the area of the web frame around the connections of the slope hopper plating to the inner hull bulkhead and the inner bottom plating, up to 2 metres from the comers both on the bulkhead and the double bottom.

structural members. Knuckle area is the area of the web frame around the connections of the slope hopper plating to the inner hull bulkhead and the inner bottom plating, up to 2 metres from the comers both on the bulkhead and the double bottom.
Note 1 Complete ballast tank: means double bottom tank plus double side tank plus double deck tank, as applicable, even if these tanks are separate.

ANNEX6A
SURVEY PROGRAMME
Basic information and particulars
Name of ship:
IMO number:
Flag State:
Port of registry :
Gross tonnage:
Deadweight (metric tonnes) :
Length between perpendiculars (m) :
Shipbuilder:
Hull number:
Recognized organization (RO) :
RO ship identity :
Date of delivery of the ship:
Owner :
Thickness measurement company:
1 Preamble
1.1 Scope
1.1.1 The present survey programme covers the minimum extent of overall surveys, close-up surveys, thickness measurements and pressure testing within the cargo area,

Owner :
Thickness measurement company:
1 Preamble
1.1 Scope
1.1.1 The present survey programme covers the minimum extent of overall surveys, close-up surveys, thickness measurements and pressure testing within the cargo area, ballast tanks, including fore and aft peak tanks, required by the Guidelines.
1.1.2 The arrangements and safety aspects of the survey should be acceptable to the attending surveyor(s).
1.2 Documentation
All documents used in the development of the survey programme should be available on board during the survey as required by section 6.
2 Arrangement of tanks and spaces
This section of the survey programme should provide information (either in the form of plans or text) on the arrangement of tanks and spaces that fall within the scope of the survey.
RESOLUTION MSC.197(80)

AND OIL TANKERS (RESOLUTION A.744(18), AS AMENDED)- 56-
3 List of tanks and spaces with information on their use, extent of coatings and corrosion protection system
This section of the survey programme should indicate any changes relating to (and should update) the information on the use of the tanks of the ship, the extent of coatings and the corrosion protective system provided in the Survey Planning Questionnaire.
4 Conditions for survey
This section of the survey programme should provide information on the conditions for survey, e.g. information regarding cargo hold and tank cleaning, gas freeing, ventilation, lighting, etc.
5 Provisions and method of access to structures
This section of the survey programme should indicate any changes relating to (and should update) the information on the provisions and methods of access to structures provided in the Survey Planning Questionnaire.
6 List of equipment for survey
This section of the survey programme should identifY and list the equipment that will be made available for carrying out the survey and the required thickness measurements.
7 Survey requirements

6 List of equipment for survey

This section of the survey programme should identifY and list the equipment that will be made available for carrying out the survey and the required thickness measurements.

7 Survey requirements

7.1 Overall survey

This section of the survey programme should identifY and list the spaces that should undergo an overall survey for the ship in accordance with 2.4.1.

7.2 Close-up survey

This section of the survey programme should identifY and list the hull structures that should undergo a close-up survey for the ship in accordance with 2.4.2.

8 Identification of tanks for tank testing

This section of the survey programme should identifY and list the tanks that should undergo tank testing for the ship in accordance with 2.6.

9 Identification of areas and sections for thickness measurements

This section of the survey programme should identifY and list the areas and sections where thickness measurements should be taken in accordance with 2.5.1.
