RESOLUTION MSC.197(80)
(adopted on 20 May 2005)
AMENDMENTS TO THE GUIDELINES ON THE ENHANCED
PROGRAMME OF INSPECTIONS DURING SURVEYS OF BULK CARRIERS
AND OIL TANKERS (RESOLUTION A.744(18), AS AMENDED)- 82-
NOTES TO THE REPORT TM2-DHT(ii)
1 This report form should be used for recording the thickness measurements of shell
plating transverse sections:
One, two or three sections within the cargo area comprising ofthe structural items

---CHUNK---

SOURCE: MSC.197(80).pdf
NOTES TO THE REPORT TM2-DHT(ii)
1 This report form should be used for recording the thickness measurements of shell
plating transverse sections:
One, two or three sections within the cargo area comprising ofthe structural items
(3), (4) and (5) and (6) as shown on the diagrams of typical transverse sections
illustrated in appendix 3 of annex 10.
2 The bottom area comprises keel, bottom and bilge plating.
3 The exact frame station of measurement should be stated.
4 The single measurements recorded are to represent the average of multiple
measurements.
5 The maximum allowable diminution could be stated in an attached document. .

NOTES TO THE REPORT TM3-DHT
I This report should be used for recording the thickness measurements of
longitudinal members at transverse sections:
One, two or three sections within the cargo area comprising of the appropriate
structural items (10) to (29) as shown on the diagrams of typical transverse
sections illustrated in appendix 3 of annex 10.
2 The exact frame station of measurement should be stated.
3 The single measurements recorded are to represent the average of multiple
measurements.
4 The maximum allowable diminution could be stated in an attached document.
