Independent information needs

12.3 Summaries are needed of the different types of anti-fouling systems and other biofouling management measures currently available, how they work and their performance under different operating conditions and situations. This information could assist shipowners and operators when making decisions about the most appropriate coatings and coating systems for their ship type and activity.

systems for their ship type and activity.

APPENDIX 1

BIOFOULING MANAGEMENT PLAN AND RECORD BOOK

Format and content of Biofouling Management Plan

The following information should be considered when developing a Biofouling Management Plan (the Plan). It is important that the Plan be specific to each ship.

The Plan may be a stand-alone document or integrated in part or full in the ships' operational and procedures manuals and/or planned maintenance systems.

INTRODUCTION

This section should contain a brief introduction for the ship's crew, explaining the need for biofouling management, and the importance of accurate record keeping.

The Plan should state that it is to be available for viewing on request by a port State authority and should be written in the working language of the crew.

SHIP PARTICULARS

At least the following details should be included:

- Ship's name.

- Flag.

- Port of registry.

and should be written in the working language of the crew.

SHIP PARTICULARS

At least the following details should be included:

- Ship's name.

- Flag.

- Port of registry.

- Gross tonnage.

- Registration number (i.e. IMO number and/or other registration numbers,
if applicable).

- Regulation Length.

- Beam.

- Ship type (as classified by Lloyds Register see Table 1).

- International call sign and Maritime Mobile Service Identity (MMSI).
