disposal point.
- Treating, reusing, recycling, destroying or otherwise
managing ship generated wastes and cargo residues
collected by waste transporters.
- Providing current contact details to RRFP point of
contact and other stakeholders as necessary.

20 Period of review an RRFP should include a schedule for regular review by the participating States to take into account changing shipping patterns, types of ship generated wastes and cargo residues, local waste infrastructure and capacity improvements and other relevant circumstances. The aim of such a review process is to ensure that the objectives of the Convention and the needs of ships using ports covered by a RRFP continue to be met.

21 Description of consultations undertaken with stakeholders in developing an RRFP this will assist in demonstrating to MEPC and stakeholders that the full range of stakeholder needs, roles and points of view have been thoroughly considered in developing an RRFP.

Part 2 Consultation with MEPC on a Regional Reception Facilities Plan

22 Submission to MEPC A proposal for a RRFP should be submitted to MEPC,

needs, roles and points of view have been thoroughly considered in developing an RRFP.

Part 2 Consultation with MEPC on a Regional Reception Facilities Plan

22 Submission to MEPC A proposal for a RRFP should be submitted to MEPC,
at least twelve months before it is expected to come into effect, for review and comment by the Committee at its next regular session. The proposal should clearly state the date the RA comes into effect. Each submission should be coordinated by the central point of contact and sponsored by all States whose ports are included in the region.

23 MEPC should consider the submission according to the following criteria:

.1 the region of application is clearly defined:

- all States and ports participating in the RA are identified; and

- a map of the region is provided;

.2 a compelling need for RA has been demonstrated through explanation of the unique circumstances that impact on the Parties' abilities to provide port

- a map of the region is provided;

.2 a compelling need for RA has been demonstrated through explanation of the unique circumstances that impact on the Parties' abilities to provide port reception facilities in every port within the region. It has also been clearly demonstrated that RA are the only practical means to meet the requirements of MARPOL. The submission should address the following considerations with respect to compelling need:

- demonstrated difficulty in managing ship generated wastes and cargo residues in PLFs caused by physical, geographical or logistical circumstances; and

- satisfactory explanation of alternative options that have been considered and why they are impractical or less efficient than RA;

.3 the RRFP contributes positively to the ability of the States involved to effectively implement their obligations under MARPOL, or to accede to if not already Party to MARPOL;

.4 the identified RSWRCs meet the needs of shipping within the region:

- ships generally call at one or more RSWRCs during a voyage within a region;

- ships generally have sufficient holding tanks and storage space for

.4 the identified RSWRCs meet the needs of shipping within the region:

- ships generally call at one or more RSWRCs during a voyage within a region;

- ships generally have sufficient holding tanks and storage space for ship generated wastes and cargo residues, to retain for discharge to an RSWRC, discharge to sea in accordance with MARPOL, or discharge at a port outside the region;

- there has been demonstrated consultation with current and expected port users to identify their needs for port reception facilities; and

- all PLFs are serviced by one or more RSWRCs;

.5 the stakeholder roles are clear and evidence is presented showing that they have been defined in consultation with the stakeholders;

.6 a suitable central point of contact has been nominated:

- appropriate administrative arrangements exist for the central point of contact to effectively carry out the role;

- consultation with stakeholders on suitability of central point of contact has been demonstrated; and

- telephone, fax and e-mail contact details are provided; and

.7 the specified period of review, as outlined in the proposal, is appropriate

has been demonstrated; and

- telephone, fax and e-mail contact details are provided; and

.7 the specified period of review, as outlined in the proposal, is appropriate given anticipated changes in shipping patterns during the period.

24 All substantive comments on the proposed RRFP should be reflected in the report of the Committee.

25 When finalizing the RRFP, the Parties proposing the RRFP should take the MEPC comments into account to enhance the ability of the RA to meet the needs of shipping. In addressing the comments, the Parties proposing the RRFP may consider actions including, but not limited to, providing additional details in the RRFP, coordinating further with stakeholders, reconfiguring RSWRCs and/or administrative arrangements, and identifying future upgrades to existing facilities. The final RRFP should describe how the MEPC comments have been taken into account.

Part 3 Communication of information

identifying future upgrades to existing facilities. The final RRFP should describe how the MEPC comments have been taken into account.

Part 3 Communication of information

26 Article 11(1)(d) of MARPOL requires Parties to communicate to the Organization a list of port reception facilities including their location, capacity and available waste management services and other characteristics. In addition, there are requirements to notify the Organization how a RRFP takes into account these Guidelines and the particulars of the

RSWRCs. Accordingly, a copy of the finalized RRFP should be forwarded to the Organization so that the Organization can notify Parties of the receipt of such information and circulate it to all Parties as required by Article 11(2).

27 In addition, all port reception facility contact details for each port should be kept up to date in GISIS, and a link to a website where the RRFP may be accessed should be provided in GISIS. Contact details for the central point of contact for the RRFP should be included. The primary responsibility for updating port reception facility details in GISIS

SOURCE: MEPC.221(63).pdf
provided in GISIS. Contact details for the central point of contact for the RRFP should be included. The primary responsibility for updating port reception facility details in GISIS remains with the port State, however, it may be prudent to assign a role to the central point of contact to monitor currency and encourage regular updates.

Part 4 Alleged inadequate port reception facilities and regional arrangements

28 A regional system based on MEPC/Circ.470 "Waste reception facility reporting requirements" should be established among port States within a region for handling formal reports of alleged inadequate port reception facilities received in the format set out in MEPC/Circ.469/Rev.1 "Revised consolidated format for reporting alleged inadequacies of
