which channel it will be made. All ships na vigating in the area should listen to the announced broadcast.

4.1.5 If necessary, individual information can be provided to a ship on the working channel, particularly in relation to positioning and na vigational assistance or local conditions. If a ship needs to anchor due to breakdown or emergency the operator can recommend suitable anchorage in the area.

4.2 Ice routeing in winter

During severe ice conditions th e traffic separation schemes may be declared not valid. Mariners will be informed of the cance llation through Notices to Mariners and by

VHF broadcasts from the VTS Centre. Ship s reporting to the Centre, will receive information on the recommended route through the ice and/or are requested to contact the regional ice-braking co-ordinator for further instructions.

4.3 Deviations

If a ship participating in the mandatory ship reporting system fails to appear on the radar

regional ice-braking co-ordinator for further instructions.

4.3 Deviations

If a ship participating in the mandatory ship reporting system fails to appear on the radar

screen or fails to communicate with the aut hority or an emergency is reported, MRCC in the area is responsible for initiating a search fo r the ship in accordance with the rules laid down for the search and rescue service, incl uding the involvement of other participating ships known to be in that particular area.

5 Radiocommunication required for the syst em, frequencies on which reports should be transmitted and information to be reported

5.1 The radio communications equipment required for the system is that defined in the GMDSS for sea area A1.

5.2 Reports shall be made by voice on VHF radi o using the primary VTS working channel.

5.3 When submitting reports the system identifier GDANREP can be omitted.

5.4 The voice call sign of the VTS Centre “Gulf of Gda sk” is “VTS Zatoka”.

5.5 The VHF working channels of the VTS Centre “Gulf of Gdask” are:

Primary channel 71 call and short report information
Reserve channel 66 as designated by VTS
Other channel 16 call and distress

5.5 The VHF working channels of the VTS Centre “Gulf of Gdask” are:

Primary channel 71 call and short report information
Reserve channel 66 as designated by VTS
Other channel 16 call and distress

5.6 Ships are required to mainta in a continuous listening watc h in the area on VTS working channel and to report and take any action required by the maritime Authorities to reduce risks.

5.7 Confidential information may be transmitted by other means, including electronically, in compliance with relevant national regulations.

5.8 The language used for communication shall be English or Polish, using the IMO Standard Marine Communications Phrases, where necessary.

6 Relevant rules and regulations in force in the area of the system

6.1 Regulations for Preventing Collisions at Sea

The International Regulations for Preventing Collisions at Sea, 1972, as amended, are applicable throughout the reporting area.

6.2 Traffic Separation Schemes

The Traffic Separation Schemes in the Gulf of Gda sk have been adopted by IMO and rule 10 of the International Regulations for Preventing Collisions at Sea applies.

6.3 Pilotage

Pilotage is mandatory in national waters under national laws.

6.4 National regulations

Relevant local regulations issued under auth ority of Director of Maritime Office in Gdynia, including Port Regulatio ns, are in force in the Poli sh internal waters and are promulgated in the nautical publications.

6.5 Dangerous and polluting cargoes

Ships carrying dangerous or polluting cargoes and bound to or from any port within the ship reporting area must comply with the in ternational and national regulations. The ship reporting system does not relieve ships mast ers of their responsibility to give the nationally required reports and information to any other relevant authorities. Discharges

reporting system does not relieve ships mast ers of their responsibility to give the nationally required reports and information to any other relevant authorities. Discharges
of oil and ship-generated waste is monito red by the authority. Ships causing pollution within the area can be prosecuted and fined.

7 Shore-based facilities to suppo rt operation of the system

7.1 VTS “Gulf of Gda sk” is equipped with radars network, VHF comm unications network, VHF-DF, Automatic Identification System (AIS) facilities, hydro-meteorological sensors and information processing and retrieval syst em. Its functions are data collection and evaluation, provision of information, naviga tion assistance, and provision of maritime safety-related information to allied services.

7.2 VTS Centre maintains a continuous 24-hour wa tch and is manned by two operators at all times. The VTS Centre is staffed with personnel trained according to national and international recommendations.

7.3 VTS Centre shares traffic image and ship reporting data with MRCC in Gdynia and other allied services.

8 Information concerning the applicable proced ures if the communication facilities of
