ANNEX 30

RESOLUTION MSC.252(83)

(adopted on 8 October 2007)

ADOPTION OF THE REVISED PERFORMANCE STANDARDS FOR
INTEGRATED NAVIGATION SYSTEMS (INS)

THE MARITIME SAFETY COMMITTEE,

RECALLING Article 28(b) of the Convention on the International Maritime Organization concerning the functions of the Committee,

RECALLING ALSO resolution A.886(21), by which the Assembly resolved that the function of adopting performance standards and technical specifications, as well as amendments thereto shall be performed by the Maritime Safety Committee and/or the Marine Environment Protection Committee, as appropriate, on behalf of the Organization,

RECALLING FURTHER regulation V/15 of the International Convention for the Safety of Life at Sea (SOLAS), 1974, concerning prin ciples relating to bri dge design, design and arrangement of navigational systems and equipment and bridge procedures,

NOTING that SOLAS regulation V/18 requi res type approved navigational systems

of Life at Sea (SOLAS), 1974, concerning prin ciples relating to bri dge design, design and arrangement of navigational systems and equipment and bridge procedures,

NOTING that SOLAS regulation V/18 requi res type approved navigational systems conforming to appropriate performance standards,

RECOGNIZING the need to revise the perfor mance standards for Integrated Navigation Systems (INS) to enhance the safety of na vigation by providing inte grated and augmented functions to avoid geographic, traffic and environmental hazards,

HAVING CONSIDERED the recommendation on the revised performance standards for Integrated Navigation Systems made by the S ub-Committee on Safety of Navigation at its

fifty-third session, and the Maritime Safety Committee at its eighty-third session,

1. ADOPTS the Revised Recommendation on pe rformance standards for Integrated Navigation Systems (INS), set out in the Annex to the present resolution;

2. RECOMMENDS Governments ensure that Integrated Navigation Systems (INS):

(a) if installed on or after 1 January 2011, conform to performance standards not inferior to those specified in the Annex to the present resolution; and

2. RECOMMENDS Governments ensure that Integrated Navigation Systems (INS):

(a) if installed on or after 1 January 2011, conform to performance standards not inferior to those specified in the Annex to the present resolution; and

(b) if installed on or after 1 January 2000 but before 1 January 2011, conform to performance standards not inferior to those specified in the Annex 3 to resolution MSC.86(70).

RESOLUTION MSC.252(83)
(adopted on 8 October 2007)
ADOPTION OF THE REVISED PERFORMANCE STANDARDS FOR INTEGRATED NAVIGATION SYSTEMS (INS)MSC 83/28/Add.3

ANNEX

PERFORMANCE STANDARDS FOR INTEGRATED NAVIGATION SYSTEMS (INS)

1 Purpose of integrated navigation systems

1.1 The purpose of integrated navigation systems (IN S) is to enhance the safety of navigation by providing integrated and augm ented functions to avoid geographic, traffic and environmental hazards.

1.2 By combining and integrating functions a nd information the INS provides “added value” for the operator to plan, monitor and/or control safety of navigation and progress of the ship.

hazards.

1.2 By combining and integrating functions a nd information the INS provides “added value” for the operator to plan, monitor and/or control safety of navigation and progress of the ship.

1.3 Integrity monitoring is an intrinsic function of the INS. The INS supports safety of navigation by evaluating inputs from several s ources, combining them to provide information

giving timely alerts of dangerous situations and system failures and degradation of integrity of this information.

1.4 The INS presents correct, timely, and unambiguo us information to the users and provides subsystems and subsequent functions within th e INS and other connected equipment with this information.

1.5 The INS supports mode and situation awareness.

1.6 The INS aims to ensure that, by taking human factors into consideration; the workload is kept within the capacity of the operator in orde r to enhance safe and ex peditious navigation and to complement the mariners capabilities, while at the same time to compensate for their limitations.

1.7 The INS aims to be demonstrably suitable for the user and the given task in a particular context of use.

to complement the mariners capabilities, while at the same time to compensate for their limitations.

1.7 The INS aims to be demonstrably suitable for the user and the given task in a particular context of use.

1.8 The purpose of the alert management is specified in module C.

2 Scope

2.1 Navigational tasks

2.1.1 An INS comprises navigational tasks such as “Route planning”, “Route monitoring”, “Collision avoidance”, “Navigatio n control data”, “Navigation status and data display” and “Alert management”, including th e respective sources, da ta and displays which are integrated into one navigation system. These tasks are described in paragraph 7.

2.1.2 An INS is defined as such if work stations provide multifunctional displays integrating at least the following navigational tasks/functions:

“Route monitoring”
“Collision avoidance”

and may provide manual and/or automatic navigation control functions.

2.1.3 Other mandatory tasks

2.1.3 Other mandatory tasks

2.1.3.1 An alert management is a part of the INS. The scope and the requirements of the alert management are specified in module C.

2.1.3.2 The presentation of navigation control data for manual contro l as specified in paragraph 7.5.2 of these performance standards is part of the INS.

2.1.4 Other navigational tasks/functions ma y also be integrated in the INS.

2.2 Task stations
