Cruise passenger ship GT 0.87 0.95 1.06 1.16

By comparing the attained annual operational CII of a specific ship with the four boundaries, a rating can then be assigned. For example, given the required CII of a bulk carrier in a specific year as 10 gCO 2/(dwt.nmile), then the superior boundary, lower boundary, upper boundary,

rating can then be assigned. For example, given the required CII of a bulk carrier in a specific year as 10 gCO 2/(dwt.nmile), then the superior boundary, lower boundary, upper boundary,
and inferior boundary is 8.6, 9.4, 10.6 and 11.8 gCO2/(dwt.nmile). If the attained CII is 9 gCO2/(dwt.nmile), the ship would be rated as B.

Organization the function of considering amendments thereto for adoption by the Parties,
HAVING CONSIDERED, at its eightieth session, proposed amendments to appendix II of the BWM Convention regarding the Form of Ballast Water Record Book,
1 ADOPTS, in accordance with article 19(2)(c) of the BWM Convention, amendments to appendix II, the text of which is set out in the annex to the present resolution;
2 DETERMINES, in accordance with article 19(2)(e)(ii) of the BWM Convention, that the amendments shall be deemed to have been accepted on 1 August 2024 unless, prior to that date, more than one-third of the Parties have notified the Secretary -General that they object to the amendments;
3 INVITES the Parties to note that, in accordance with article 19(2)(f)(ii) of the BWM Convention, the said amendments shall enter into force on 1 February 2025, upon their acceptance, in accordance with paragraph 2 above;
4 REQUESTS the Secretary -General, for the purposes of article 19(2)(d) of the BWM Convention, to transmit certified copies of the present resolution and the text of the amendments contained in the annex to all Parties to the BWM Convention;

AMENDMENTS TO THE INTERNATIONAL CONVENTION FOR THE CONTROL AND MANAGEMENT OF SHIPS BALLAST WATER AND SEDIMENTS, 2004- 3 -

Introduction

In accordance with regulation B-2 of the annex to the International Convention for the Control and Management of Ships Ballast Water and Sediments, a record is to be kept of each ballast water operation. This includes discharges at sea and to reception facilities.

Ballast water means water with its suspended matter taken on board a ship to control trim, list, draught, stability, or stresses of a ship. Management of ballast water shall be in accordance with an approved Ballast Water Management Plan and take into account guidelines developed by the Organization.
