6. Description of the emission monitoring arrangements and components and necessary ancillary equipment or requirements. Including details of the respective sampling points relative to the layout of the device including, if fitted, the discharge water handling arrangements
7. Details of monitoring device zero and span check, calibration, maintenance and servicing requirements and timings and the means of verification that those actions have been undertaken as required
8. Description of the monitoring and record-keeping arrangements and the capability of the recording device to produce operating/emission reports for

the means of verification that those actions have been undertaken as required
8. Description of the monitoring and record-keeping arrangements and the capability of the recording device to produce operating/emission reports for selected parameters as required
9. The means by which recorded emissions values, set against the Events Record, compared to the respective limit values would be reviewed

In addition, the TWTD File should include other checkpoints, as appropriate to the particular type of thermal waste treatment device and its manner of operation, that would confirm its correct operation and performance
7.2 The TWTD File for each TWTD model should be approved by the Administration
Means by which TWTD File for each device will be submitted for approval
7.3 Amendments to the TWTD File which reflect changes that affect aspects covered by these Functional Objectives and the associated TWTD Technical
Means by which amendments to previously approved TWTD File will be submitted for approval prior to application to in-service devices
RESOLUTION MEPC.373(80) (adopted on 7 July 2023)

Functional objective Content of TWTD Technical Report
Report or emissions performance, should
be approved by the Administration. Where
these are to be applied to previously
certified devices and reflect necessary
changes to the TWTD File as approved,
those changes should not be applied prior
to their approval by the Administration.
Where additions, deletions or
amendments to the TWTD File are
separate to the TWTD File as initially
approved, they should be retained with the
TWTD File and should be considered as
part of it
8. Performance Level 2

8.1 Where a device is to be approved and
individual units certified to Performance
Level 2, and as a result the device requires
additional or alternative fittings, settings,
operating procedures, documentation or
other aspects in order to achieve that

---CHUNK---

individual units certified to Performance
Level 2, and as a result the device requires
additional or alternative fittings, settings,
operating procedures, documentation or
other aspects in order to achieve that
performance level, then that should be
reflected as relevant in each of the
respective Functional Objectives as listed
above
Information, procedures, records,
restrictions or other as appropriate to
achieving and maintaining
Performance Level 2

6 Certification process

6.1 The certification process divides into two parts. The first is the approval of the proposed TWTD model as an equivalent means under regulation 4 of MARPOL Annex VI. The second part is the approval of individual units of that TWTD operating on the basis of the equivalent means as approved.

6.2 The approval by the Administration of the TWTD model as an equivalent means should be on the basis of the applicant -submitted TWTD Technical Report together with, if appropriate, any additional information in the supporting information annex. The TWTD Technical Report should specify whether the units are to be certified to Performance Level 1

appropriate, any additional information in the supporting information annex. The TWTD Technical Report should specify whether the units are to be certified to Performance Level 1 or Performance Level 2 and, in the latter case, contain the necessary supporting data including the Pre-approval Test report.

6.3 Any subsequent amendments to the information as given in the TWTD Technical Report or which affect emissions performance as controlled by these Guidelines should be approved by the Administration before being applied to individual thermal waste treatme nt devices in service.

6.4 Following approval of the TWTD model as an equivalent means then individual units should be certified by the Administration in accordance with the agreed procedures as set out in the TWTD Technical Report as approved.

6.5 An approved TWTD should be issued with a TWTD Certificate, as set out in the annex, by the Administration and have TWTD File as approved by that Administration.

6.6 Following satisfactory completion of installation test procedure as given in the TWTD File, section 2.6 of the Supplement to the International Air Pollution Prevention Certificate should be duly updated.

6.7 Individual thermal waste treatment devices should thereafter be subject to the survey procedures as given in the approved TWTD File at those times the ship on which the device is installed is surveyed in accordance with the applicable MARPOL Annex VI survey regime.

6.8 Amendments to the TWTD as installed, operated or monitored should be duly covered by amendments to the TWTD File as approved by the Administration before they are applied in service.
