mandatory technical and operational energy efficiency measures for ships under MARPOL Annex VI,
ACKNOWLEDGING ALSO the decisions of the Assembly at its thirtieth and thirty -second sessions in December 2017 and December 2021, respectively, that approved for the Organization a strategic direction to "Respond to climate change",
RECALLING that the Committee at its seventy -second session (MEPC 72) in April 2018 adopted, by resolution MEPC.304(72), the Initial IMO Strategy on Reduction of GHG Emissions from Ships (Initial IMO GHG Strategy),
NOTING that the Initial IMO GHG Strategy foresees that a revised IMO GHG Strategy should be adopted in 2023,
RECALLING the United Nations 2030 Agenda for Sustainable Development,
RECALLING ALSO the Paris Agreement adopted at the UN Climate Change Conference (COP 21), which identifies the long -term goal to hold the increase in the global average temperature to well below 2°C above pre -industrial levels and to pursue efforts to limit the temperature increase to 1.5°C above pre -industrial levels, recognizing that this would significantly reduce the risks and impacts of climate change, as was also reaffirmed in the

temperature increase to 1.5°C above pre -industrial levels, recognizing that this would significantly reduce the risks and impacts of climate change, as was also reaffirmed in the Glasgow Climate Pact at COP 26 and in the Sharm el-Sheikh Implementation Plan at COP 27,
RECALLING FURTHER IMO Assembly resolution A.998(25) on the need to develop capacity-building for the development and implementation of new instruments and amendments to existing instruments,
RECALLING that the Maritime Safety Committee at its 107th session decided to initiate work on the "Development of a safety regulatory framework to support the reduction of GHG emissions from ships using new technologies and alternative fuels",
HAVING CONSIDERED, at its eightieth session, the draft 2023 IMO strategy on reduction of GHG emissions from ships,
RESOLUTION MEPC.377(80) (adopted on 7 July 2023)
2023 IMO STRATEGY ON REDUCTION OF GHG EMISSIONS FROM SHIPSMEPC 80/17/Add.1

1 ADOPTS the 2023 IMO Strategy on Reduction of GHG Emissions from Ships (2023 IMO GHG Strategy) as set out in the annex to the present resolution;

2 ACKNOWLEDGES the challenges that developing countries, in particular least

developed countries (LDCs) and small island developing States (SIDS) , may face in the implementation of the 2023 IMO GHG Strategy;

3 ALSO ACKNOWLEDGES the importance of addressing the human element, including the impact on seafarers and other maritime professionals, in the safe implementation of the 2023 IMO GHG Strategy;

4 INVITES the Secretary -General to make adequate provisions in the Integrated Technical Cooperation Programme (ITCP), the IMO GHG TC-Trust Fund and any other means of support related to follow -up actions to the 2023 IMO GHG Strategy that may be further decided by the Committee and undertaken by developing countries, in particular LDCs and SIDS;

5 AGREES to keep the 2023 IMO GHG Strategy under review with a view to the adoption of a revised IMO GHG Strategy in 2028;

6 ALSO AGREES that the 2023 IMO GHG Strategy revokes the 2018 Initial IMO GHG

1 INTRODUCTION

1.1 The International Maritime Organization (IMO or the Organization) is the United Nations specialized agency responsible for safe, secure and efficient shipping and the prevention of pollution from ships.

1.2 The 2023 IMO Strategy on Reduction of GHG Emissions from Ships (the 2023 IMO GHG Strategy) represents the continuation of work by IMO as the appropriate international body to address greenhouse gas (GHG) emissions from international shipping. This work includes Assembly resolution A.963(23) on IMO policies and practices related to the reduction of greenhouse gas emissions from ships , adopted on 5 December 2003, urging the Marine Environment Protection Committee (MEPC or the Committee) to identify and develop the

of greenhouse gas emissions from ships , adopted on 5 December 2003, urging the Marine Environment Protection Committee (MEPC or the Committee) to identify and develop the mechanisms needed to achieve the limitation or reduction of GHG emissions from international shipping.

1.3 In response to the Assembly's request, work to address GHG emissions from ships has been undertaken by the Organization, as summarized in appendix 1.

1.4 The Initial IMO Strategy on Reduction of GHG Emissions from Ships (resolution

MEPC.304(72)) was the first milestone set out in the Road map for developing a comprehensive IMO strategy on reduction of GHG emissions from ships (the Road Map) approved at MEPC 70. The Road Map identified that a revised strategy was to be adopted in 2023.

1.5 The adoption of the 2023 IMO GHG Strategy is the latest milestone set out in the Road Map. The 2023 IMO GHG Strategy also sustains the momentum and represents the continuation of work by IMO as the appropriate international body to address GHG emissions from international shipping.

Context

1.6 The 2023 IMO GHG Strategy falls within a broader context that includes:
