APPENDIX 3

EXAMPLE FORM OF BIOFOULING MANAGEMENT PLAN

INTRODUCTION

Biofouling on ships can be a significant vector for the transfer of invasive aquatic species. Biofouling management practices may also improve a ship's hydrodynamic performance and can be effective at enhancing energy efficiency, hence reducing air emissio ns from ships as well as fuel costs.

This Biofouling Management Plan (BFMP) should assist the ship crew in conducting biofouling management and is specific to this ship.

SHIP PARTICULARS

Name of ship
IMO number
Date of construction
Ship type
Gross tonnage

Beam or ship's breadth
Length overall
Maximum and minimum draughts

RECORD OF REVISION OF THE BFMP

This plan describes the biofouling management for the period between two scheduled

RECORD OF REVISION OF THE BFMP

This plan describes the biofouling management for the period between two scheduled
dry-dockings which include application, reapplication, installation or renewal of the AFS .
The plan should be re-evaluated and, if necessary, updated after a dry -docking and/or if any
