measures on States, including
developing countries, in particular on LDCs and SIDS, and their specific
emerging needs, as recognized in the Revised Strategic Plan for the
Organization (resolution A.1149(32)); and
.4 the need for evidence -based decision -making balanced with the
precautionary approach as set out in resolution MEPC.67(37).
4 CANDIDATE SHORT -, MID - AND LONG -TERM GHG REDUCTION MEASURES
WITH POSSIBLE TIMELINES AND THEIR IMPACTS ON STATES
Timelines
4.1 Candidate measures set out in this 2023 IMO GHG Strategy should be consistent with
the following timelines:
.1 short-term GHG reduction measures are the measures finalized and agreed
by the Committee between 2018 and 2023, as included in appendix 1;
.2 the basket of mid -term GHG reduction measures should be finalized and
agreed by the Committee by 2025. Dates of entry into force and when the
measure(s) can effectively start to reduce GHG emissions could be defined
for the basket or for each measure individually;

agreed by the Committee by 2025. Dates of entry into force and when the
measure(s) can effectively start to reduce GHG emissions could be defined
for the basket or for each measure individually;
.3 other candidate mid -term GHG reduction measures could be finalized and
agreed by the Committee between 2023 and 2030. Dates of entry into force
and when the measure can effectively start to reduce GHG emissions would
be defined for each measure individually; and
.4 possible long-term measures could be measures finalized and agreed by the
Committee beyond 2030, to be developed as part of the 2028 review of the
IMO GHG Strategy.
4.2 The list of candidate measures is non-exhaustive and is without prejudice to measures
the Organization may further consider and adopt.
Short-term GHG reduction measures
4.3 In accordance with regulations 25.3 and 28.11 of MARPOL Annex VI, a review of the
mandatory goal -based technical and operational measures to reduce carbon intensity of
international shipping (the "short -term GHG reduction measures") shall be completed
by 1 January 2026.
4.4 The Committee may decide to initiate a review of the other short-term measure(s) as

international shipping (the "short -term GHG reduction measures") shall be completed
by 1 January 2026.
4.4 The Committee may decide to initiate a review of the other short-term measure(s) as
included in appendix 1.
Basket of candidate mid-term GHG reduction measures
4.5 In accordance with the timelines set out in this Strategy and the Work Plan, a basket
of candidate measure(s), delivering on the reduction targets, should be developed and
finalized comprised of both:
RESOLUTION MEPC.377(80) (adopted on 7 July 2023)
2023 IMO STRATEGY ON REDUCTION OF GHG EMISSIONS FROM SHIPSMEPC 80/17/Add.1
Annex 15, page 8
I:\MEPC\80\MEPC 80-17-Add.1.docx
.1 a technical element, namely a goal -based marine fuel standard regulating
the phased reduction of the marine fuel's GHG intensity; and
.2 an economic element, on the basis of a maritime GHG emissions pricing
mechanism.
The candidate economic elements will be assessed observing specific criteria to be considered
in the comprehensive impact assessment, with a view to facilitating the finalization of the
basket of measures.

mechanism.
The candidate economic elements will be assessed observing specific criteria to be considered
in the comprehensive impact assessment, with a view to facilitating the finalization of the
basket of measures.
The mid-term GHG reduction measures should effectively promote the energy transition of
shipping and provide the world fleet with a needed incentive while contributing to a level play
ing
field and a just and equitable transition.
4.6 In accordance with Phase III of the Work Plan, the measure(s) in the basket should
b
