MSCResolutions/MSC.570(109).pdf
the Recommendation on performance standards for a universal automatic identification system (AIS) to improve the safety of navigation,
TAKING INTO ACCOUNT resolution A.1192(33), by which the Assembly urged Member States and all relevant stakeholders to promote actions to prevent illegal operations in the maritime sector by the "dark fleet" or "shadow fleet",
RECOGNIZING the need for measures to prevent unauthorized entry or tampering of the ship's identity information in shipborne automatic identification systems (AIS),
HAVING CONSIDERED, at its 109th session, the recommendation made by the Sub-Committee on Navigation, Communications and Search and Rescue at its eleventh session,
1 ADOPTS revised Performance standards for a universal shipborne automatic identification system (AIS), set out in the annex to the present resolution;
2 RECOMMENDS that Governments ensure that AIS equipment conforms to performance standards not inferior to those specified in:

2 RECOMMENDS that Governments ensure that AIS equipment conforms to performance standards not inferior to those specified in:
.1 the present resolution if the equipment is installed on:
.1 new ships for which the building contract is placed on or after 1 January 2029, or in the absence of the contract, the keel of which is laid or which are at a similar stage of construction on or after 1 January 2029; or
.2 ships other than those ships prescribed in sub-paragraph .1 above, all installations of the specified type, having a contractual delivery date on or after 1 January 2029, or in the absence of a contractual delivery date to the ship, actually delivered to the ship on or after 1 January 2029; or
.2 annex 3 to resolution MSC.74(69) if the equipment is installed on ships other than those prescribed in paragraph 2.1 above.
RESOLUTION MSC.570(109) (adopted on 6 December 2024)
PERFORMANCE STANDARDS FOR A UNIVERSAL
SHIPBORNE AUTOMATIC IDENTIFICATION SYSTEM (AIS)

ANNEX
PERFORMANCE STANDARDS FOR
A UNIVERSAL SHIPBORNE AUTOMATIC IDENTIFICATION SYSTEM (AIS)
1 Scope
1.1 These performance standards specify the requirements for the universal AIS.
1.2 The AIS should improve the safety of navigation by assisting in the efficient navigation of ships, protection of the environment, and operation of vessel traffic services (VTS), by satisfying the following functional requirements:
.1 in a ship-to-ship mode for collision avoidance;
.2 as a means for littoral States to obtain information about a ship and its cargo; and
.3 as a VTS tool, i.e. ship-to-shore (traffic management).
1.3 The AIS should be capable of providing to ships and to competent authorities

.3 as a VTS tool, i.e. ship-to-shore (traffic management).
1.3 The AIS should be capable of providing to ships and to competent authorities information from the ship, automatically and with the required accuracy and frequency, to facilitate accurate tracking. Transmission of the data should be with the minimum involvement of a ship's personnel and with a high level of availability.
1.4 The installation, in addition to meeting the requirements of the Radio Regulations, applicable ITU -R Recommendations and the general requirements as set out in resolution A.694(17), should comply with the following performa
