RESOLUTION MSC.36(63)
(adopted on 20 May 1994)
ADOPTION OF THE INTERNATIONAL CODE OF SAFETY
FOR HIGH SPEED CRAFT MSC 62123/Add.2
ANNEX 18
Page 82
8.1. 7
8.1. 8
8.1. 9
8.1.10
The Administration should require life-saving appliances to be subjected to such production tests as are necessary to ensure that the life-saving appliances are manufactured to the same standard as the approved prototype.
Procedures adopted by the Administration for approval should also include the conditions whereby approval would continue or would be withdrawn.
The Administration should determine the period of acceptability of life-saving appliances which are subject to deterioration with age. Such life-saving appliances should be marked with a means for determining their age or the date by which they should be replaced.
For the purposes of this chapter, unless expressly provided otherwise:

Such life-saving appliances should be marked with a means for determining their age or the date by which they should be replaced.
For the purposes of this chapter, unless expressly provided otherwise:
. 1 "Detection" is the determination of the location of survivors or survival craft .
. 2 "Embarkation ladder" is the ladder provided at survival craft embarkation stations to permit safe access to survival craft after launching •
. 3 "Embarkation station" is the place from which a survival craft is boarded. An embarkation station may also serve as a muster station, provided there is sufficient room, and the muster station activities can safely take place there .
. 4 "Float-free launching" is that method of launching a survival craft whereby the craft is automatically released from a sinking craft and is ready for use .
. 5 "Free-fall launching" is that method of launching a survival craft whereby the craft with its complement of persons and equipment on board is released and allowed to fall into the sea without any restraining apparatus •
. 6 "Immersion suit" is a protective suit which reduces the body heat-loss of a person wearing it in cold water .

equipment on board is released and allowed to fall into the sea without any restraining apparatus •
. 6 "Immersion suit" is a protective suit which reduces the body heat-loss of a person wearing it in cold water .
. 7 "Inflatable appliance" is an appliance which depends upon non-rigid, gas-filled chambers for buoyancy and which is normally kept uninflated until ready for use .
. 8 "Inflated appliance" is an appliance which depends upon non-rigid, gas-filled chambers for buoyancy and which is normally kept inflated and ready for use at all times .
. 9 "Launching appliance or arrangement" is a means of transferring a survival craft or rescue boat from its stowed position safely to the water .
. 10 "Marine evacuation system"(MES) is an appliance designed to rapidly transfer large number of persons from an embarkation station by means of a passage to a floating platform for subsequent embarkation into associated survival craft or

directly into associated survival craft.
