ANNEX
2011 GUIDELINES FOR THE DEVELOPMENT OF THE INVENTORY
OF HAZARDOUS MATERIALS
1 Introduction
1.1 Objectives of the Guidelines
These Guidelines provide recommendations for developing the Inventory of Hazardous Materials (hereinafter referred to as "the Inventory") to assist compliance with regulation 5 (Inventory of Hazardous Materials) of the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009 (hereinafter referred to as "the Convention").
1.2 Application of the Guidelines
These Guidelines have been developed to provide relevant stakeholders (e.g., shipbuilders,

Safe and Environmentally Sound Recycling of Ships, 2009 (hereinafter referred to as "the Convention").
1.2 Application of the Guidelines
These Guidelines have been developed to provide relevant stakeholders (e.g., shipbuilders, equipment suppliers, repairers, shipowners and ship management companies) with the essential requirements for practical and logical development of the Inventory.
1.3 Objectives of the Inventory
The objectives of the Inventory are to provide ship-specific information on the actual Hazardous Materials present on board, in order to protect health and safety and to prevent environmental pollution at Ship Recycling Facilities. This information will be used by the Shi
p
Recycling Facilities in order to decide how to manage the types and amounts of materials identified in the Inventory of Hazardous Materials (regulation 9).
2 Definitions
The terms used in these Guidelines have the same meaning as those defined in the Convention, with the following additional definitions which apply to these Guidelines only.
"Homogeneous material" means a material of uniform composition throughout that cannot be

Convention, with the following additional definitions which apply to these Guidelines only.
"Homogeneous material" means a material of uniform composition throughout that cannot be mechanically disjointed into different materials, meaning that the materials cannot, in principle, be separated by mechanical actions such as unscrewing, cutting, crushing, grinding and abrasive processes.
"Product" means machinery, equipment, materials and applied coatings on board a ship.
"Supplier" means a company which provides products; which may be a manufacturer, trader or agency.
"Supply chain" means the series of e
