amendments to MARPOL Annex VI to introduce the data collection system for fuel oil consumption of ships, containing mandatory requirements for ships to record and report their fuel oil consumpt ion, and also adopted the Road map for developing a comprehensive IMO strategy on reduction of GHG emissions from ships (the Road Map). Ships of 5,000 gross tonnage and above (representing approximately 85% of the total GHG emissions from international shipping) are required to collect consumption data for each type of fuel oil they use, as well as other, additional, specified data including proxies for "transport work";
.5 MEPC 72 (April 2018) adopted, by resolution MEPC.304(72), the Initial IMO Strategy on Reduction of GHG Emissions from Ships , setting out a vision which confirmed IMO's commitment to reducing GHG emissions from international shipping and to phasing them out as soon as possible, and agreed to keep the Initial Strategy under review, with a view to adoption of a Revised Strategy in 2023;
.6 MEPC 73 (October 2018) approved the Programme of follow-up actions of the Initial IMO Strategy , intended to be used as a planning tool in meeting
