selective catalytic reduction (SCR) systems are such NO x-reducing
devices for compliance with the Tier III NOX limit,
NOTING FURTHER that, at its seventy-first session, it adopted, by resolution MEPC.291(71),
the 2017 Guidelines addressing additional aspects to the NOX Technical Code 2008 with regard
to particular requirements related to marine diesel engines fitted with Selective Catalytic
Reduction (SCR) Systems (2017 SCR Guidelines), and, at its seventy -fourth session, by
resolution MEPC.313(74), amendments thereto,
RECOGNIZING the need to update the 2017 SCR Guidelines in line with the latest
developments,
HAVING CONSIDERED, at its eighty -third session, a draft revision of the 2017 SCR
Guidelines, prepared by the Sub-Committee on Pollution Prevention and Response,
1 ADOPTS the 2025 Guidelines on selective catalytic reduction (SCR) systems, as set
out in the annex to the present resolution;

Guidelines, prepared by the Sub-Committee on Pollution Prevention and Response,
1 ADOPTS the 2025 Guidelines on selective catalytic reduction (SCR) systems, as set
out in the annex to the present resolution;
2 INVITES Administrations to implement the 2025 SCR Guidelines and apply them to
SCR systems installed on ships the keels of which are laid or which are at a similar stage of
construction on or after 1 November 2025; or SCR systems installed on ships the kee ls of
which are laid or which are at a similar stage of construction before 1 November 2025 which
have a contractual delivery date of SCR systems to the ship on or after 1 May 2026 or, in the
absence of a contractual delivery date, the actual delivery of the SCR system to the ship on or
after 1 May 2026;
3 REQUESTS Parties to MARPOL Annex VI and other Member Governments to bring
the annexed Guidelines to the attention of shipowners, ship operators, shipbuilders, marine
diesel engine manufacturers and any other interested parties;
4 AGREES to keep these Guidelines under review in light of experience gained with their
application, with a view to incorporating them into the NOx Technical Code 2008;
