ANNEX
2025 ACTION PLAN TO ADDRESS MARINE PLASTIC LITTER FROM SHIPS
1 Background
1.1 Marine plastic litter enters the marine environment as a result of a wide range of
land- and sea-based activities. Both macroplastics (e.g. large plastic items such as plastic
bags, water bottles and fishing gear) and microplastics (small plastic particle s generally fiv
e
millimetres or less in size) persist in the marine environment and result in harmful effects on
marine life and biodiversity, as well as negative impacts on human health. In addition, marine
plastic litter negatively impacts activities such as tourism, fisheries and shipping. This plas

material has the potential to be brought back into the economy by means of reuse or recycling.
Studies demonstrate that despite the existing regulatory framework to prevent marine plastic
litter from ships, discharges into the sea continue to occur.
1.2 IMO has recognized the importance of preventing pollution by garbage, including
plastics, from ships since the adoption of MARPOL Annex V, as well as the dumping of various
types of waste, including plastics, into the sea through the Convention on the Pre vention of
Marine Pollution by Dumping of Wastes and Other Matter 1972 (London Convention or LC)
and its 1996 Protocol (London Protoc
