d to initiate the revision of the Initial IMO
Strategy on Reduction of GHG Emissions from Ships, recognizing the need
to strengthen the ambition during the revision process; and adopted
resolution MEPC.342(77) on Protecting the Arctic from shipping Black
Carbon emissions recognizing that Black Carbon was a potent short -lived
contributor to climate warming; and
.11 MEPC 78 (June 2022) adopted a series of 10 technical guidelines to support
the implementation of the short-term GHG reduction measure;
.12 Council 128 (November 2022) endorsed the finalized terms of reference of a
Voluntary Multi-Donor Trust Fund to Facilitate the Participation of Developing
Countries, Especially Small Island Developing States (SIDS) and Least
Developed Countries (LDCs) i n IMO GHG Meetings, and agreed to review

Voluntary Multi-Donor Trust Fund to Facilitate the Participation of Developing
Countries, Especially Small Island Developing States (SIDS) and Least
Developed Countries (LDCs) i n IMO GHG Meetings, and agreed to review
the terms of reference, based on the experience of the first full year of
operations of the Fund, no later than at the 130th session of the Council;
.13 MEPC 79 (December 2022) adopted amendments to MARPOL Annex VI to
revise the data collection system for fuel oil consumption for the
implementation of the EEXI and the CII framework, approved a Revised
procedure for assessing the impacts on States of candidate measures
(MEPC.1/Circ.885/Rev.1) and adopted resolutions MEPC.366(79) and
MEPC.367(79) on Invitation to Member States to encourage voluntary
cooperation between the port and the shipping sectors to contribute to
reducing GHG emissions from ships and Encouragement of Member States
to develop and submit voluntary National Action Plans (NAPs) t o address
GHG emissions from ships, respectively; and
.14 MEPC 80 (July 2023) adopted resolution MEPC.376(80) on Guidelines on
life cycle GHG intensity of marine fuels (LCA guidelines); initiated the

GHG emissions from ships, respectively; and
.14 MEPC 80 (July 2023) adopted resolution MEPC.376(80) on Guidelines on
life cycle GHG intensity of marine fuels (LCA guidelines); initiated the
comprehensive impact assessment of the basket of candidate mid -term
measures; and adopted resolution MEPC.377(80) on 2023 IMO Strategy on
Reduction of GHG Emissions from Ships (2023 IMO GHG Strategy).
RESOLUTION MEPC.377(80) (adopted on 7 July 2023)
2023 IMO STRATEGY ON REDUCTION OF GHG EMISSIONS FROM SHIPSMEPC 80/17/Add.1

APPENDIX 2
OVERVIEW OF RELEVANT INITIATIVES BY THE ORGANIZATION SUPPORTING THE
REDUCTION OF GHG EMISSIONS FROM SHIPS
An overview of relevant IMO initiatives supporting the reduction of GHG emissions from ships
is provided below:
.1 The Integrated Technical Cooperation Programme (ITCP) is designed to
assist Governments which lack the technical knowledge and resources that
are needed to operate a shipping industry safely and efficiently. Support for
IMO's GHG -related activities under the ITCP is a clear priority for the
Organization. For 2022-2023, a dedicated global programme "Reducing

are needed to operate a shipping industry safely and efficiently. Support for
IMO's GHG -related activities under the ITCP is a clear priority for the
Organization. For 2022-2023, a dedicated global programme "Reducing
atmospheric emissions from ships and in ports and effective implementation
of MARPOL Annex VI and the Initial IMO GHG Strategy" was designed to
assist Member States with the implementation of the Initial IMO Strategy,
thereby increasing energy efficiency measures for ships, as well as reducing
atmospheric pollution from ships, including when in ports.
.2 MEPC 74 (May 2019) agreed to establish a voluntary multi-donor trust
fund ("GHG TC
