fuel is compliant with the requirements
set out in chapter 5 of this Annex and its associated guidelines.
5 Refer to the 2024 Guidelines on life cycle GHG intensity of marine fuels (resolution MEPC.39
1(81)), as may
be amended.
RESOLUTION MEPC.403(83) (adopted on 11 April 2025)
AMENDMENTS TO THE 2022 GUIDELINES ON SURVEY AND CERTIFICATION
OF THE ENERGY EFFICIENCY DESIGN INDEX (EEDI)MEPC 83/17/Add.1
Annex 11, page 9
I:\MEPC\MEPC 83-17-Add.1.docx
.18 Target annual GHG fuel intensity (target annual GFI), expressed in grams of
CO2eq per unit of energy (gCO 2eq/MJ), is the value of the two tiers target
annual GFI (base target and direct compliance target) in accordance with
regulation 35 of this Annex.
.19 Zero or near-zero GHG emission technologies, fuels and/or energy sources
(ZNZs) means the type of ZNZs that qualifies for the annual fuel reward in
accordance with regulation 39.
Regulation 3
Exceptions and exemptions
General
1 Regulations of this Annex shall not apply to:

(ZNZs) means the type of ZNZs that qualifies for the annual fuel reward in
accordance with regulation 39.
Regulation 3
Exceptions and exemptions
General
1 Regulations of this Annex shall not apply to:
.1 any emission necessary for the purpose of securing the safety of a ship or
saving life at sea; or
.2 any emission resulting from damage to a ship or its equipment:
.1 provided that all reasonable precautions have been taken after the
occurrence of the damage or discovery of the emission for the
purpose of preventing or minimizing the emission; and
.2 except if the owner or the master acted either with intent to cause
damage, or recklessly and with knowledge that damage would
probably result.
Trials for ship emission reduction and control technology research
2 The Administration of a Party may, in cooperation with other Administrations as
appropriate, issue an exemption from specific provisions of this Annex for a ship to conduct tr
ials
for the development of ship emission reduction and control technologies and engine design
programmes. Such an exemption shall only be provided if the applications of specific provisions

for the development of ship emission reduction and control technologies and engine design
programmes. Such an exemption shall only be provided if the applications of specific provisions
of the Annex or the revised NO x Technical Code 2008 could impede research into the
development of such technologies or programmes. A permit issued under this regulation shall not
exempt a ship from the reporting requirement under regulation 27 and regulation 37 shall not
alter the type and scope of data required to be reported under regulation 27 and regulation 37.
A permit for such an exemption shall only be provided to the minimum number of ships
necessary and be subject to the following provisions:
.1 for marine diesel engines with a per cylinder displacement up to 30 L, the
duration of the sea trial shall not exceed 18 months. If additional time is
required, a permitting Administration or Administrations may permit a renewal
for one additional 18-month period; or
.2 for marine diesel engines with a per cylinder displacement at or above 30 L,
the duration of the ship trial shall not exceed five years and shall require a

for one additional 18-month period; or
.2 for marine diesel engines with a per cylinder displacement at or above 30 L,
the duration of the ship trial shall not exceed five years and shall require a
progress review by the permitting Administration or Administrations at each
intermediate survey. A permit may be withdrawn based on this review if the
testing has not adhered to the conditions of the permit or if it is determined that
the technology or programme is not likely to produce effective results in the
reduction and control of s
