RESOLUTION MSC.136(76)
(adopted on 11 December 2002)
PERFORMANCE STANDARDS FOR A SHIP SECURITY ALERT SYSTEM
THE MARITIME SAFETY COMMITTEE,
RECALLING Article 28(b) of the Convention on the International Maritime Organization concerning the functions of the Committee,
RECALLING ALSO resolution A.886(21), by which the Assembly resolved that the functions of adopting performance standards for radio and navigational equipment, as well as amendments thereto, shall be performed by the Maritime Safety Committee on behalf of the Organization,
RECALLING FURTHER the provisions of the new chapter XI-2 of the International Convention for the Safety of Life at Sea (SOLAS), 1974, as amended, and the requirements of regulation XI-2/5, that all ships shall be provided with a ship security alert system,
RECOGNIZING that, for security reasons, a sh ip security alert system is necessary on board for initiating and transmitting a ship-to-shore security alert to a competent authority

RECOGNIZING that, for security reasons, a sh ip security alert system is necessary on board for initiating and transmitting a ship-to-shore security alert to a competent authority designated by the Administration,
HAVING CONSIDERED the recommendation made by the Sub-Committee on Safety of Navigation at its forty-eighth session,
1. ADOPTS the Recommendation on Performance Standards for a ship security alert system, set out in the Annex to the present resolution;
2. RECOMMENDS Governments to ensure that a ship security alert system provided in compliance with relevant international instruments in force on or after 1 July 2004 conforms to performance standards not inferior to those specified in the Annex to the present resolution.

ANNEX
RECOMMENDATION ON PERFORMANCE STANDARDS
FOR A SHIP SECURITY ALERT SYSTEM
1 Introduction
1.1 The ship security alert system is provided to a ship for the purpose of transmitting a security alert to the shore to indicate to a competent authority that the security of the ship is under
threat or has been compromised. It comprises a minimum of two activation points, one of which is on the navigation bridge. These initiate the transmission of a ship security alert. The sy stem is
intended to allow a covert activation to be made which alerts the competent authority ashore a nd
does not raise an alarm on board ship nor alert other ships.
1.2 As required by its Administration, the compet ent authority receiving the alert notifies th e
authority responsible for maritime security with in its Administration, the coastal State(s) in whose vicinity the ship is presently operating, or other Contracting Governments.
1.3 The procedures for the use of the ship s ecurity alert system and the location of the activation points are given in the ship security plan agreed by the Administration.
