Subject: **Technical Seminar on Onboard Carbon Capture and Storage (OCCS) Systems, 11 September 2025**

1 The Marine Environment Division, in particular the Future Fuels and Technology (FFT) Project, is organizing a Technical Seminar on Onboard Carbon Capture and Storage (OCCS) Systems, scheduled to take place on 11 September 2025 at IMO Headquarters, 4 Albert Embankment, London SE1 7SR, in the margins of the eleventh session of the Sub-Committee on Carriage of Cargoes and Containers (CCC 11).

2 OCCS technology is one of the potential technical solutions to reduce greenhouse gas (GHG) emissions from shipping, in support of achieving the GHG reduction objectives set out in the 2023 IMO Strategy on Reduction of GHG Emissions from Ships (resolution MEPC.377(80)).

3 The aim of the one-day Technical Seminar is to enhance the understanding of the latest developments in OCCS technology, infrastructure readiness and relevant environmental, safety and human element perspectives, with a view to supporting the ongoing activities under the Work plan on the development of a regulatory framework for the use of onboard carbon capture and storage, approved by MEPC 83. The provisional programme for the Seminar is set out in the annex. More detailed information regarding the programme and speakers will be circulated in due course.

4 A limited number of speaker slots are available and interested Member States and organizations are invited to nominate speakers and inform the Secretariat by email at futurefuels@imo.org by **20 June 2025**, at the latest.

5 Seminar participants will be subject to the Code of Conduct for Delegates, Observers and Other Participants at IMO Meetings, Events and Activities to Prevent Harassment including Sexual Harassment (see Circular Letter No.4908 of 20 August 2024).

6 The Technical Seminar will be conducted as an in-person event at IMO Headquarters, with hybrid support for remote participation, and in English only without interpretation.

7 To participate, registration is required by **5 September 2025** using the following link: https://forms.office.com/e/6NUpPxVjNr. In case of any further queries, please email the FFT Project team at futurefuels@imo.org.

ANNEX

PROVISIONAL PROGRAMME FOR THE TECHNICAL SEMINAR ON ONBOARD CARBON CAPTURE AND STORAGE (OCCS) SYSTEMS

Topic and contents	Speakers/participants (tentative)
Setting the Scene – IMO's Ongoing work on Onboard Carbon Capture Systems (OCCS)	
Overview of IMO's ongoing work on developing the regulatory framework for OCCS	**IMO Secretariat**
Session 1: State-of-play in OCCS technology developments (11.00-12.30)	
Overview of recent developments in OCCS: commercial and technology readiness Q&A	**OCCS technology providers, ship builders, R&D-pilot programmes, etc.**
Session 2: State-of-play in associated OCCS landside and infrastructure readiness (14:00-15:30)	
Overview of recent developments in captured carbon offloading, reception, storage or utilization Q&A	**Ports, onshore/offshore carbon capture and storage/utilization facilities, R&D-pilot programmes, etc.**
Session 3: Environmental, safety, and human element perspectives on OCCS technology use	
Perspectives on the environmental and safety perspectives of OCCS technology, and associated training and skills requirements, sea trial conditions, class rules and Flag approval experiences Q&A	**Flag administrations, classification societies, ship owners, NGOs, etc.**
