(October 2014) approved the Third IMO GHG Study 2014,
estimating that GHG emissions from international shipping in 2012
accounted for some 2.2% of anthropogenic CO 2 emissions and that such
emissions could grow by between 50% and 250% by 2050;
.4 MEPC 70 (October 2016) adopted, by resolution MEPC.278(70),
for fuel oil consumption of ships, containing mandatory requirements for
ships to record and report their fuel oil consumpt ion, and also adopted the

for fuel oil consumption of ships, containing mandatory requirements for
ships to record and report their fuel oil consumpt ion, and also adopted the
Road map for developing a comprehensive IMO strategy on reduction of
GHG emissions from ships (the Road Map). Ships of 5,000 gross tonnage
and above (representing approximately 85% of the total GHG emissions from
international shipping) are required to collect consumption data for each type
of fuel oil they use, as well as other, additional, specified data including
proxies for "transport work";
.5 MEPC 72 (April 2018) adopted, by resolution MEPC.304(72), the Initial IMO
Strategy on Reduction of GHG Emissions from Ships , setting out a vision
which confirmed IMO's commitment to reducing GHG emissions from
international shipping and to phasing them out as soon as possible, and
agreed to keep the Initial Strategy under review, with a view to adoption of a
Revised Strategy in 2023;
.6 MEPC 73 (October 2018) approved the Programme of follow-up actions of
the Initial IMO Strategy , intended to be used as a planning tool in meeting
-
Revised Strategy in 2023;
.6 MEPC 73 (October 2018) approved the Programme of follow-up actions of
the Initial IMO Strategy , intended to be used as a planning tool in meeting
the timelines identified in the Initial IMO Strategy;
.7 MEPC 74 (May 2019) approved MEPC.1/Circ.855 on Procedure for
assessing the impacts on States of candidate measures; adopted resolution
MEPC.323(74) on Inviting Member States to encourage voluntary
cooperation between the port and shipping sectors to contribute to reducing
GHG emissions from ships, as revised by MEPC 79 by resolution
MEPC.366(79); and agreed to establish a voluntary multi -donor trust fund
("GHG TC-Trust Fund"), to provide a dedicated source of financial support
for technical cooperation and capacity development activities to support the
implementation of the Initial IMO Strategy on Reduction of GHG Emissions
from Ships;

.8 MEPC 75 (November 2020) adopted resolution MEPC.327(75) on Encouraging Member States to develop and submit voluntary National Action Plans to address GHG emissions from ships, as revised by MEPC 79 by resolution MEPC.367(79); approved the Fourth IMO GHG Study 2020 ; and adopted, by resolution MEPC.324(75),
advancing and strengthening EEDI Phase 3 requirements for several ship types;
.9 MEPC 76 (June 2021) adopted, by resolution MEPC. 328(76), amendments to MARPOL Annex VI introducing the short -term GHG reduction measure containing a technical Energy Efficiency Existing Ship Index (EEXI), an operational Carbon Intensity Indicator (CII) an d an enhanced Ship Energy Efficiency Management Plan (SEEMP); adopted a series of seven technical guidelines supporting the EEXI and CII frameworks; approved a Work plan to progress development of mid- and long-term GHG reduction measures in
