nic recording and reporting should be encouraged as it may have

many benefits and may allow ships to utilize their technology to reduce administrative burdens

and contrib ute to onboard environmental initiatives, e.g. reduction of paper use. In case

electronic recording is to be used, resolution MEPC.312(74) may be used for guidance.

Biofouling Record Book Part I contains many references to observations regarding fouling

rating. These observations may be included in separate reports including observations of

subsections and corresponding photos/video. The entries in Biofouling Record Book Part I may

be a summary only including a conclusion on whether the activity is in line with the BFMP.

Biofouling Record Book Part I should be kept on board the ship in a place where it is readily

available for inspection at all reasonable times and for the life of the ship. Any inspection of

Biofouling Record Book Part I should be performed as expeditiously as possible without

causing the ship to be unduly delayed.
