Guidelines, prepared by the Sub-Committee on Pollution Prevention and Response,

1 ADOPTS the 2025 Guidelines on selective catalytic reduction (SCR) systems, as set out in the annex to the present resolution;

2 INVITES Administrations to implement the 2025 SCR Guidelines and apply them to SCR systems installed on ships the keels of which are laid or which are at a similar stage of

construction on or after 1 November 2025; or SCR systems installed on ships the kee ls of which are laid or which are at a similar stage of construction before 1 November 2025 which have a contractual delivery date of SCR systems to the ship on or after 1 May 2026 or, in the

absence of a contractual delivery date, the actual delivery of the SCR system to the ship on or

after 1 May 2026;

3 REQUESTS Parties to MARPOL Annex VI and other Member Governments to bring the annexed Guidelines to the attention of shipowners, ship operators, shipbuilders, marine diesel engine manufacturers and any other interested parties;

1 INTRODUCTION
1.1 The use of NOx-reducing devices is envisaged in section 2.2.5 of the NO x Technical Code 2008 (NTC 2008) and a Selective Catalytic Reduction (SCR) system is one of such devices.
1.2 The NTC 2008 contains two ways for pre -certification of engine systems fitted with NOx-reducing devices:
.1 engine fitted with SCR: approval in accordance with paragraph 2.2.5.1 and test in accordance with chapter 5 of the NTC 2008; and
.2 a simplified measurement method in accordance with section 6.3 of the NTC 2008 as regulated in paragraph 2.2.5.2 (Primary failure case) of the Code.

test in accordance with chapter 5 of the NTC 2008; and

.2 a simplified measurement method in accordance with section 6.3 of the NTC 2008 as regulated in paragraph 2.2.5.2 (Primary failure case) of the Code.

1.3 According to paragraph 2.2.5.1 of the NTC 2008, where a NOx-reducing device is to be included within the EIAPP certification, it must be recognized as
