CALCULATION METHODS (CII GUIDELINES, G1)

1 Introduction

1.1 In the Initial IMO Strategy on Reduction of GHG Emissions from Ships (Resolution

MEPC.304(72)), the level of ambition on carbon intensity of international shipping is quantified

by the CO2 emissions per transport work, as an average across international shipping.

1.2 These Guidelines address the calculation methods and the applicability of the

operational carbon intensity indicator (CII) for individual
