Emissions from Ships
and its Programme of follow-up actions;
.10 MEPC 77 (November 2021) agreed to initiate the revision of the Initial IMO Strategy on Reduction of GHG Emissions from Ships, recognizing the need to strengthen the ambition during the revision process; and adopted resolution MEPC.342(77) on Protecting the Arctic from shipping Black Carbon emissions recognizing that Black Carbon was a potent short -lived contributor to climate warming; and
.11 MEPC 78 (June 2022) adopted a series of 10 technical guidelines to support the implementation of the short-term GHG reduction measure;
.12 Council 128 (November 2022) endorsed the finalized terms of reference of a Voluntary Multi-Donor Trust Fund to Facilitate the Participation of Developing Countries, Especially Small Island Developing States (SIDS) and Least Developed Countries (LDCs) i n IMO GHG Meetings, and agreed to review
-
Voluntary Multi-Donor Trust Fund to Facilitate the Participation of Developing Countries, Especially Small Island Developing States (SIDS) and Least Developed Countries (LDCs) i n IMO GHG Meetings, and agreed to review the terms of reference, based on the experience of the first full year of operations of the Fund, no later than at the 130th session of the Council;
.13 MEPC 79 (December 2022) adopted
revise the data collection system for fuel oil consumption for the implementation of the EEXI and the CII framework, approved a Revised procedure for assessing the impacts on States of candidate measures (MEPC.1/Circ.885/Rev.1) and adopted resolutions MEPC.366(79) and MEPC.367(79) on Invitation to Member States to encourage voluntary cooperation between the port and the shipping sectors to contribute to reducing GHG emissions from ships and Encouragement of Member States to develop and submit voluntary National Action Plans (NAPs) t o address GHG emissions from ships, respectively; and
.14 MEPC 80 (July 2023) adopted resolution MEPC.376(80) on Guidelines on life cycle GHG intensity of marine fuels (LCA guidelines); initiated the

APPENDIX 2

OVERVIEW OF RELEVANT INITIATIVES BY THE ORGANIZATION SUPPORTING THE REDUCTION OF GHG EMISSIONS FROM SHIPS

An overview of relevant IMO initiatives supporting the reduction of GHG emissions from ships

is provided below:

.1 The Integrated Technical Cooperation Programme (ITCP) is designed to assist Governments which lack the technical knowledge and resources that are needed to operate a shipping industry safely and efficiently. Support for IMO's GHG -related activities under the ITCP is a clear priority for the Organization. For 2022-2023, a dedicated global programme "Reducing

-

are needed to operate a shipping industry safely and efficiently. Support for IMO's GHG -related activities under the ITCP is a clear priority for the Organization. For 2022-2023, a dedicated global programme "Reducing atmospheric emissions from ships and in ports and effective implementation of MARPOL Annex VI and the Initial IMO GHG Strategy" was designed to assist Member States with the implementation of the Initial IMO Strategy, thereby increasing energy efficiency measures for ships, as well as reducing atmospheric pollution from ships, including when in ports.

.2 MEPC 74 (May 2019) agreed to establish a voluntary multi-donor trust fund ("GHG TC -Trust Fund"), to provide a dedicated source of financial support for technical cooperation and capacity development activities to support the implementation of the Initial IMO Strategy on Reduction of GHG Emissions from Ships (MEPC 74/18/Add.1, annex 17). The resources of the Trust Fund include voluntary contributions from IMO Member States, UN agencies, international organizations and other entities who have expressed support for the Initial IMO Strategy.
