voyage adjustments for CII calculations (CII guidelines, G5) (resolution MEPC.355(78)).

RESOLUTION MEPC.403(83) (adopted on 11 April 2025)

OF THE ENERGY EFFICIENCY DESIGN INDEX (EEDI)MEPC 83/17/Add.1

Annex 11, page 50

I:\MEPC\MEPC 83-17-Add.1.docx

2 Within three months after the end of each calendar year, the ship shall report to its

Administration, or any organization duly authorized by it,64 the attained annual operational CII

via electronic communication and using a standardized format developed by the

Organization.65

3 Notwithstanding 1 and 2 of this regulation, in the event of any transfer of a ship

addressed in regulations 27.4, 27.5 or 27.6 completed after 1 January 2023, a ship shall, after

the end of the calendar year in which the transfer takes place, calculate and report the attained

annual operational CII for the full 12 -month period from 1 January to 31 December in the

-

the end of the calendar year in which the transfer takes place, calculate and report the attained

annual operational CII for the full 12 -month period from 1 January to 31 December in the

calendar year during which the transfer took place, in accordance with regulations 28.1

and 28.2, for verification in accordance with regulation 6.6 of this Annex, taking into account

guidelines developed by the Organization. 66 Nothing in this regulation relieves any ship of its

reporting obligations under regulation 27 or this regulation of this Annex.

Required annual operational carbon intensity indicator (required annual operational CII)

4 For each ship of 5,000 gross tonnage and above which falls into one or more of the

categories in regulations 2.2.5 to 2.2.7, 2.2.9, 2.2.12 to 2.2.14, 2.2.20, and 2.2.24 to 2.2.27 of

this Annex, the required annual operational CII shall be determined as follows:

Required annual operational CII = (1 – Z100) • CIIR

where,

Z is the annual reduction factor to ensure continuous improvement of the ship's

operational carbon intensity within a specific rating level; and

CIIR is the reference value.

-

Required annual operational CII = (1 – Z100) • CIIR

where,

Z is the annual reduction factor to ensure continuous improvement of the ship's

operational carbon intensity within a specific rating level; and

CIIR is the reference value.

5 The annual reduction factor Z 67 and the reference value CII R shall be the values

defined taking into account the guidelines to be developed by the Organization.68

Operational carbon intensity rating

6 The attained annual operational CII shall be documented and verified against the

required annual operational CII to determine operational carbon intensity rating A, B, C, D or

E, indicating a major superior, minor superior, moderate, minor inferior or inferior performance

level, either by the Administration or by any organization duly authorized by it, 69 taking into

64 Refer to the Code for Recognized Organizations (RO Code) (resolutions MSC.349(92) and MEPC.237(65)).

65 Refer to the 2022 Guidelines for Administration verification of ship fuel oil consumption data and

operational carbon intensity (resolution MEPC.348(78)), as amended by resolution MEPC.389(81)).

-

65 Refer to the 2022 Guidelines for Administration verification of ship fuel oil consumption data and

operational carbon intensity (resolution MEPC.348(78)), as amended by resolution MEPC.389(81)).

66 Refer to the 2022 Guidelines for Administration verification of ship fuel oil consumption data and

operational carbon intensity (resolution MEPC.348(78)), as amended by resolution MEPC.389(81)).

67 The annual reduction factor is specific to each category of ship. This factor is defined to increase progressively

to meet the objectives of the Initial IMO Strategy on reduction of GHG emissions from ships (resolution

MEPC.304(72)).

68 Refer to the 2021 Guidelines on the operational carbon intensity reduction factors relative to reference lines

(CII red
