THE MARINE ENVIRONMENT PROTECTION COMMITTEE

RECALLING Article 38(a) of the Convention on the International Maritime Organization

concerning the functions of the Marine Environment Protection Committee conferred upon it

by international conventions for the prevention and control of marine pollution from ships,

RECALLING ALSO that, at its eightieth session, it adopted, by resolution MEPC.377(80),

the 2023 IMO Strategy on Reduction of GHG Emissions from Ships (2023 IMO GHG Strategy)

setting out the levels of ambition for the international shipping sector in reducing

GHG emissions,

NOTING that the 2023 IMO GHG Strategy provides that in order to support the global

-

setting out the levels of ambition for the international shipping sector in reducing

GHG emissions,

NOTING that the 2023 IMO GHG Strategy provides that in order to support the global

availability and uptake of zero or near -zero GHG emission technologies, fuels and/or energy

sources, the Organization may consider and analyse measures to address emissions of

methane (CH4) and nitrous oxide (N2O),

HAVING CONSIDERED, at its eighty-third session, draft guidelines for test-bed and onboard

measurements of methane (CH 4) and/or nitrous oxide (N 2O) emissions from marine

diesel engines,

1 ADOPTS the Guidelines for test-bed and onboard measurements of methane (CH 4)

and/or nitrous oxide (N 2O) emissions from marine diesel engines , as set out in the annex to

the present resolution;

2 INVITES Member States to encourage shipowners, ship operators, shipbuilders,

marine diesel engine manufacturers and any other interested groups to voluntarily apply these

Guidelines when undertaking measurements, calculation and reporting of CH 4 and/or N 2O

emission values from marine diesel engines;

3 ALSO INVITES Member States to share data gathered in applying these Guidelines

-

Guidelines when undertaking measurements, calculation and reporting of CH 4 and/or N 2O emission values from marine diesel engines;

3 ALSO INVITES Member States to share data gathered in applying these Guidelines to future sessions of the Committee;

4 AGREES to keep these Guidelines under review in light of the experience gained with their implementation.

RESOLUTION MEPC.402(83) (adopted on 11 April 2025)

GUIDELINES FOR TEST-BED AND ONBOARD MEASUREMENTS OF METHANE (CH4) AND/OR NITROUS OXIDE (N2O) EMISSIONS FROM MARINE DIESEL ENGINESMEPC 83/17/Add.1

ANNEX

GUIDELINES FOR TEST-BED AND ONBOARD MEASUREMENTS OF METHANE (CH4) AND/OR NITROUS OXIDE (N2O) EMISSIONS FROM MARINE DIESEL ENGINES

1 Introduction

1.1 The purpose of these Guidelines is to specify the protocol for test -bed and onboard measurements, calculation and reporting of methane (CH 4) and/or nitrous oxide (N 2O) emission values from marine diesel engines, as well as documentation and verification of CH4 and/or N2O emission values.

1.2 The measurements, calculations and reporting for CH 4 and/or N2O emission values

-

emission values from marine diesel engines, as well as documentation and verification of CH4 and/or N2O emission values.

1.2 The measurements, calculations and reporting for CH 4 and/or N2O emission values should be carried out in accordance with the NO x Technical Code 2008 as amended, (NTC 2008) other than as specifically provided for in the protocol set out in appendix 1 of these Guidelines. All references in appendix 1 are to NTC 2008.

1.3 For onboard measurements, the protocol set out in appendix 1 may be accepted for an Individual Engine or for an Engine Group represented by the Parent Engine. It should not be accepted for an Engine Family without further justifications. For test-bed measurements, the protocol may also be accepted for an Engine Family.1

2 Information to be included in the CH4 and/or N2O file

2.1 The applicant for the establishment of the emission values shoul
