ANNEX 16

RESOLUTION MSC.245(83)

(adopted on 12 October 2007)

RECOMMENDATION ON A STANDARD METHOD FOR EVALUATING

CROSS-FLOODING ARRANGEMENTS

THE MARITIME SAFETY COMMITTEE,

RECALLING Article 28(b) of the Convention on the International Maritime Organization

concerning the functions of the Committee,

RECALLING ALSO resolution A.266(VIII) entitled “Recommendation on a standard

method for establishing compliance with the re quirements for cross-flooding arrangements in

passenger ships”, adopted by the Assembly at its eighth session,

NOTING that the above Recommendation does not include provisions for cross-flooding

arrangements other than pipes (i .e., cross-flooding times through ducts) or a provision to ensure

adequate air ventilation for efficient cross-flooding (i.e., to account for the restrictive effect of air

counter pressure during cross-flooding),

NOTING ALSO the revised SOLAS chapte r II-1 subdivision and damage stability

-

adequate air ventilation for efficient cross-flooding (i.e., to account for the restrictive effect of air

counter pressure during cross-flooding),

NOTING ALSO the revised SOLAS chapte r II-1 subdivision and damage stability

requirements for passenger and cargo ships, adopted by resolution MSC.216(82),

RECOGNIZING the need to establish a methodology for evaluating cross-flooding

arrangements on ships subject to the applicable s ubdivision and damage stability requirements of

SOLAS chapter II-1 to ensure uniform treatment of cross-flooding and equalization

arrangements,

HAVING CONSIDERED the recommendations made by the Sub-Committee on Stability

and Load Lines and on Fishing Vessels Safety at its fiftieth session,

1. ADOPTS the Recommendation on a standa rd method for evalua ting cross-flooding

arrangements, the text of which is set out in the Annex to the present resolution;
2. INVITES Governments to apply the a nnexed Recommendation to cross-flooding calculations and to bring the Recommendation to the attention of all parties concerned.
