ANNEX 30
RESOLUTION MSC.252(83)
(adopted on 8 October 2007)
ADOPTION OF THE REVISED PERFORMANCE STANDARDS FOR
INTEGRATED NAVIGATION SYSTEMS (INS)
THE MARITIME SAFETY COMMITTEE,
RECALLING Article 28(b) of the Convention on the International Maritime Organization concerning the functions of the Committee,
RECALLING ALSO resolution A.886(21), by which the Assembly resolved that the function of adopting performance standards and technical specifications, as well as amendments
thereto shall be performed by the Maritime Safety Committee and/or the Marine Environment Protection Committee, as appropriate, on behalf of the Organization,
RECALLING FURTHER regulation V/15 of the International Convention for the Safety of Life at Sea (SOLAS), 1974, concerning prin ciples relating to bri dge design, design and arrangement of navigational systems and equipment and bridge procedures,
NOTING that SOLAS regulation V/18 requi res type approved navigational systems
-
of Life at Sea (SOLAS), 1974, concerning prin ciples relating to bri dge design, design and arrangement of navigational systems and equipment and bridge procedures,
NOTING that SOLAS regulation V/18 requi res type approved navigational systems
conforming to appropriate performance standards,
RECOGNIZING the need to revise the perfor mance standards for Integrated Navigation Systems (INS) to enhance the safety of na vigation by providing inte grated and augmented functions to avoid geographic, traffic and environmental hazards,
HAVING CONSIDERED the recommendation on the revised performance standards for Integrated Navigation Systems made by the S ub-Committee on Safety of Navigation at its fifty-third session, and the Maritime Safety Committee at its eighty-third session,
1. ADOPTS the Revised Recommendation on pe rformance standards for Integrated Navigation Systems (INS), set out in the Annex to the present resolution;
2. RECOMMENDS Governments ensure that Integrated Navigation Systems (INS):
(a) if installed on or after 1 January 2011, conform to performance standards not

inferior to those specified in the Annex to the present resolution; and

-

2. RECOMMENDS Governments ensure that Integrated Navigation Systems (INS):

(a) if installed on or after 1 January 2011, conform to performance standards not

inferior to those specified in the Annex to the present resolution; and

(b) if installed on or after 1 January 2000 but before 1 January 2011, conform to

performance standards not inferior to those specified in the Annex 3 to

resolution MSC.86(70).

RESOLUTION MSC.252(83)

(adopted on 8 October 2007)

ADOPTION OF THE REVISED PERFORMANCE STANDARDS FOR

INTEGRATED NAVIGATION SYSTEMS (INS)MSC 83/28/Add.3

ANNEX

PERFORMANCE STANDARDS FOR INTEGRATED

NAVIGATION SYSTEMS (INS)

1 Purpose of integrated navigation systems

1.1 The purpose of integrated navigation systems (IN S) is to enhance the safety of navigation

by providing integrated and augm ented functions to avoid geographic, traffic and environmental

hazards.

1.2 By combining and integrating functions a nd information the INS provides ■added value■

for the operator to plan, monitor and/or control safety of navigation and progress of the ship.

-

hazards.

1.2 By combining and integrating functions a nd information the INS provides ■added value■

for the operator to plan, monitor and/or control safety of navigation and progress of the ship.

1.3 Integrity monitoring is an intrinsic function of the INS. The INS supports safety of

navigation by evaluating inputs from several s ources, combining them to provide information

giving timely alerts of dangerous situations and system failures and degradation of integrity of

this information.

1.4 The INS presents correct, timely, and unambiguo us information to the users and provides

subsystems and subsequent functions within th e INS and other connected equipment with this

information.

1.5 The INS supports mode and situation awareness.

1.6 The INS aims to ensure that, by taking human factors into consideration; the workload i
