RESOLUTION MSC.565(108) (adopted on 24 May 2024)

REVISED INTERIM RECOMMENDATIONS FOR CARRIAGE OF

LIQUEFIED HYDROGEN IN BULK

MSC 108/20/Add.1

Annex 20, page 2

I:\MSC\108\MSC 108-20-Add.1.docx

ANNEX

REVISED INTERIM RECOMMENDATIONS FOR CARRIAGE

OF LIQUEFIED HYDROGEN IN BULK

1 INTRODUCTION

1.1 For the carriage of liquefied gases in bulk by ships, the ships should comply with the

relevant requirements in the IGC Code, as amended ("the Code"). The scope of the Code

provided in paragraph 1.1.1 is:

"The Code applies to ships regardless of their size, including those of less

than 500 gross tonnage, engaged in the carriage of liquefied gases having a vapour

pressure exceeding 0.28 MPa absolute at a temperature of 37.8°C, and other

products, as shown in chapter 19, when carried in bulk".

1.2 A ship carrying liquefied hydrogen in bulk (hereinafter called "liquefied hydrogen

---

products, as shown in chapter 19, when carried in bulk".

1.2 A ship carrying liquefied hydrogen in bulk (hereinafter called "liquefied hydrogen

carrier") should comply with the Code.

1.3 The Code requires that a gas carrier should comply with the minimum requirements

for the cargo listed in chapter 19. However, the requirements for liquefied hydrogen are not

specified in the Code.

1.4 This annex provides the Revised Interim Recommendations, as referred to in

paragraph 5 of the preamble of the Code, for the carriage of liquefied hydrogen in bulk, which

are intended to provide the basis for the future minimum requirements for the carriage of this

cargo. The Revised Interim Recommendations are intended to facilitate the establishme nt of

a tripartite agreement among the relevant Administrations for the carriage of liquefied

hydrogen

in bulk. However, they are not intended to prohibit the adoption of designs and arrangements

in bulk. However, they are not intended to prohibit the adoption of designs and arrangements

other than those specified in the Code or in these Recommendations, at the discretion of the

Administrations.

1.5 These recommendations have been developed under the assumption that a liquefied

hydrogen carrier does not carry liquefied gases other than liquefied hydrogen. These

recommendations, therefore, are not applicable to liquefied hydrogen carriers carrying gases

other than liquefied hydrogen.

1.6 In the Code, reference is made to paragraph 5 of the Preamble; paragraph 1.1.6.1;

and Note No.8 on completion of certificate in "model form of international certificate of fitness

for the carriage of liquefied gases in bulk" in appendix 2 to the Code.

1.7 These Revised Interim Recommendations consist of the following parts. Part A is

applicable to ships with any type of cargo containment system. Part B and subsequent part(s)

URL: https://wwwcdn.imo.org/localresources/en/KnowledgeCentre/IndexofIMOResolutions/MSCResolutions/MSC.566(109).pdf

applicable to ships with any type of cargo containment system. Part B and subsequent part(s)

prescribe additional special requirements for cargo containment systems of specific types.

Part A: General (applicable to ships with any type of cargo containment

system);

Part B: Cargo containment systems of independent cargo tanks using vacuum

insulation; and

Part C: Cargo containment systems of independent cargo tanks using insulation

materials and hydrogen gas in the inner insulation spaces.

RESOLUTION MSC.565(108) (adopted on 24 May 2024)

REVISED INTERIM RECOMMENDATIONS FOR CARRIAGE OF

LIQUEFIED HYDROGEN IN BULK

1.8 Part A of this document was developed based on the design of parts B and C.

If subsequent part(s) are added, the special requirements prescribed in part A may be

reviewed.

Part A

General

(Applicable to ships with any type of cargo containment system)
